vegetables with plenty of sun water and rich organic soil That was the time when people did not bother about spraying every single plant surface with poisonous pesticides So naturally the habit of digging my fingers deep into rich soil continued when I grew up But that was when I found out that the world consisted of places where you could not manage to have huge gardens outdoors As adults it was possible that you would spend most of your time living in cooped up flats like pigeons or doves in their cotes So it was natural that I began to look for other ways and means in which I could grow my own kitchen garden in those limited areas And so I began kitchen gardening on the roof But if you have a large backyard so much the better Remember a kitchen garden is a thing of beauty and a joy forever You are going to get fresh fruit and vegetables throughout the year You have the pleasure of making something outdoors You do not have to restrict your kitchen garden to just vegetables you can also plant herbs and even flowers My kitchen garden has sunflowers marigolds Gladiolus and even roses
