Knowledge Readings In Contemporary Epistemology By Sven Bernecker:

Reading Epistemology Sven Bernecker, 2006-01-30 Designed for readers who have had little or no exposure to contemporary theory of knowledge *Reading Epistemology* brings together twelve important and influential writings on the subject Presents twelve influential pieces of writing representing two contrasting views on each of six core topics in epistemology Each chapter contains an introduction to the topic introductions to the authors extensive commentaries on the texts questions for debate and an annotated bibliography Includes writings from Robert Nozick Ernest Sosa Laurence Bonjour and Fred Dretske Encourages readers to engage with the texts and to think for themselves **Knowledge** Sven Bernecker, Fred Dretske, 2004 **Epistemology** Robert Audi, 2003 This comprehensive book introduces the concepts and theories central for understanding knowledge It aims to reach students who have already done an introductory philosophy course Topics covered include perception and reflection as grounds of knowledge and the nature structure and varieties of knowledge The character and scope of knowledge in the crucial realms of ethics science and religion are also considered Unique features of *Epistemology* Provides a comprehensive survey of basic concepts and major theories Gives an up to date account of important developments in the field Contains many lucid examples to support ideas Cites key literature in an annotated bibliography *Epistemology* Robert M. Martin, 2014-07-01 How do you know what you know *Epistemology* is the philosophical study of knowledge Without knowledge scientific enquiry is meaningless and we can't begin to analyse the world around us What is knowledge How do you know you are not dreaming Should we trust our senses Presuming no prior experience of philosophy this book covers everything in the topic from scepticism and possible worlds to Kant's transcendentalism Clear and readable *Epistemology A Beginner's Guide* is essential reading for students and aspiring thinkers **The Bounds of Freedom: Kant's Causal Theory of Action** Robert Greenberg, 2016-09-26 This monograph is a new interpretation of Kant's temporal conception of the causality of the freedom of the will The interpretation is based on an analysis of Kant's primary conception of an action viz as a causal consequence of the will The analysis in turn is based on H. P. Grice's causal theory of perception and on P. F. Strawson's modification of the theory The monograph rejects the customary assumption that Kant's maxim of an action is a causal determination of the action It assumes instead that the maxim is definitive of the action and since its main thesis is that an action for Kant is to be primarily understood as an effect of the will it concludes that the maxim of an action can only be its logical determination Kant's temporal conception of the causality of free will is confronted not only by contemporary philosophical conceptions of causality but by Kant's own complementary theory of causality in the Second Analogy of Experience According to this latter conception causality is a natural relation among physical and psychological objects and is therefore a temporal relation among them Faced with this conflict Kant scholars like Allen W. Wood either reject Kant's temporal conception of causality or like Henry E. Allison accept it but only in an ad hoc form Both camps however make the aforementioned assumption that Kant's maxim of an action is a

causal determination of the action The monograph rejecting the assumption belongs to neither camp Rethinking Epistemology Günter Abel,James Conant,2011-12-23 This volume contains contributions to the systematic study of knowledge They suggest both an extension and a new path for classical epistemology The topics in the first volume are the following concepts and forms of knowledge epistemic perspectivism knowledge and world views perceptual knowledge scientific knowledge models in science distributed and integrated knowledge interaction of forms of knowledge and relation between forms of knowledge and forms of representation **What is this thing called Knowledge?** Duncan Pritchard,2013-10-01 What is knowledge Where does it come from What kinds of knowledge are there Can we know anything at all This lucid and engaging introduction grapples with these central questions in the theory of knowledge offering a clear non partisan view of the main themes of epistemology Both traditional issues and contemporary ideas are discussed in sixteen easily digestible chapters each of which conclude with a useful summary of the main ideas discussed study questions annotated further reading and a guide to internet resources Each chapter also features text boxes providing bite sized summaries of key concepts and major philosophers and clear and interesting examples are used throughout The book concludes with an annotated guide to general introductions to epistemology a glossary of key terms and a summary of the main examples used in epistemology This an ideal first textbook in the theory of knowledge for undergraduates coming to philosophy for the first time The third edition has been revised and updated throughout and features two new chapters on religious knowledge and scientific knowledge as part of a whole new section on what kinds of knowledge there are In addition the text as a whole has been refreshed to keep it up to date with current developments *The Routledge Companion to Epistemology* Sven Bernecker,Duncan Pritchard,2011-01-19 Epistemology the philosophy of knowledge is at the core of many of the central debates and issues in philosophy interrogating the notions of truth objectivity trust belief and perception The Routledge Companion to Epistemology provides a comprehensive and the up to date survey of epistemology charting its history providing a thorough account of its key thinkers and movements and addressing enduring questions and contemporary research in the field Organized thematically the Companion is divided into ten sections Foundational Issues The Analysis of Knowledge The Structure of Knowledge Kinds of Knowledge Skepticism Responses to Skepticism Knowledge and Knowledge Attributions Formal Epistemology The History of Epistemology and Metaepistemological Issues Seventy eight chapters each between 5000 and 7000 words and written by the world s leading epistemologists provide students with an outstanding and accessible guide to the field Designed to fit the most comprehensive syllabus in the discipline this text will be an indispensable resource for anyone interested in this central area of philosophy The Routledge Companion to Epistemology is essential reading for students of philosophy **Righting Epistemology** Breido Johnsen,2017-04-03 David Hume launched a historic revolution in epistemology when he showed that our theories about the world have no probability relative to what we think of as our evidence for them hence that the distinction between justified and unjustified theories does not lie in their

different probabilities relative to that evidence However allies in his revolution appeared only in the 20th century in the persons of Sir Karl Popper Nelson Goodman and W V Quine Hume s second great contribution to the field which remains unrecognized to this day was to propose what is now known as reflective equilibrium theory as the framework within which justified and unjustified theories are rightly distinguished The core of this book comprises an account of these developments from Hume to Quine an extension of reflective equilibrium theory that renders it a general theory of epistemic justification concerning our beliefs about the world and an argument that all four of these thinkers would have endorsed that extension In chapters on Sextus Descartes Wittgenstein s On Certainty and other aspects of Hume s epistemology I defend new readings of those philosophers writings on skepticism and note significant relationships among their views on matters bearing on the Humean revolution Finally in chapters on Hilary Putnam s Brains in a Vat and Fred Dretske s contextualism the only promising version of that view I show that both fail to rule out the possible truth of radical skeptical hypotheses This is not surprising since those hypotheses are in fact possible They are not however of any epistemological significance since the justification of our beliefs about the world is a function of the extent to which bodies of beliefs to which they belong are in reflective equilibrium and no extant conception of knowledge is of any epistemological interest

Rational Choice and Democratic Deliberation Guido Pincione, Fernando R. Tesón, 2006-07-24 This book offers a comprehensive and sustained critique of theories of deliberative democracy

Restoring the Foundations of Epistemic Justification Steven Porter, 2006-11-06 Foundationalism as a theory of justification and knowledge is often associated with Enlightenment rationality the Cartesian thirst for certainty and the modern assumption of the objectivity and universality of reason Because of these associations scholars in various fields have disdained foundationalism in favor of some sort of non foundationalist post modern approach to knowledge and justification This present book is one piece of a much wider conversation that hopes to motivate a renewed look at foundationalism Of course the foundationalism on offer has settled down quite a bit from its surly forbears This more mild mannered foundationalism suggests that our beliefs about reality can be held with confidence and yet these beliefs remain open to criticism and revision It is this type of epistemology that provides a constructive basis for investigation and research while nevertheless encouraging a cognitive humility about our claims to possess truth

Towards an Epistemology of Ruptures Arun Iyer, 2014-01-23 By systematically uncovering and comprehensively examining the epistemological implications of Heidegger s history of being and Foucault s archaeology of discursive formations Towards an Epistemology of Ruptures shows how Heidegger and Foucault significantly expand the notions of knowledge and thought This is done by tracing their path breaking responses to the question What is the object of thought The book shows how for both thinkers thought is not just the act by which the object is represented in an idea and knowledge not just a state of the mind of the individual subject corresponding to the object Each thinker in his own way argues that thought is a productive event in which the subject and the object gain their respective identity and knowledge is the opening

up of a space in which the subject and object can encounter each other and in which true and false statements about an object become possible They thereby lay the ground for a new conceptual framework for rethinking the very relationship between knowledge and its object

Empiricism and Experience Anil Gupta, 2006-08-31 This book offers a novel account of the relationship of experience to knowledge The account builds on the intuitive idea that our ordinary perceptual judgments are not autonomous that an interdependence obtains between our view of the world and our perceptual judgments Anil Gupta shows in this important study that this interdependence is the key to a satisfactory account of experience He uses tools from logic and the philosophy of language to argue that his account of experience makes available an attractive and feasible empiricism

Epistemic Contextualism Peter Baumann, 2016-10-13 Peter Baumann develops and defends a distinctive version of epistemic contextualism the view that the truth conditions or the meaning of knowledge attributions of the form S knows that p can vary with the context of the attributor The first part of the book examines arguments for contextualism and develops Baumann's version The first chapter deals with the argument from cases and ordinary usage the following two chapters address theoretical arguments from reliability and from luck The second part of the book discusses the problems contextualism faces to which it must respond and provides an extension of contextualism beyond epistemology Chapter 4 discusses lottery scepticism and argues for a contextualist response Chapter 5 is dedicated to a homemade problem for contextualism a threat of inconsistency Baumann argues for a way out and for a version of contextualism that can underwrite this solution Chapter 6 proposes a contextualist account of responsibility The concept of knowledge is not the only one which allows for a contextualist analysis and it is important to explore structural analogies in other areas of philosophy The third part of the book is focused on some major objections to contextualism and alternative views namely subject sensitive invariantism contrastivism and relativism

Human Agency and Divine Will Charlotte Katzoff, 2020-05-26 This book explores the conjuncture of human agency and divine volition in the biblical narrative sometimes referred to as double causality A commonly held view has it that the biblical narrative shows human action to be determined by divine will Yet when reading the biblical narrative we are inclined to hold the actors accountable for their deeds The book then challenges the common assumptions about the sweeping nature of divine causality in the biblical narrative and seeks to do justice to the roles played by the human actors in the drama God s causing a person to act in a particular way as He does when He hardens Pharaoh s heart is the exception rather than the rule On the whole the biblical heroes act on their own their personal initiatives and strivings are what move the story forward How does it happen then that events remarkably conspire to realize God s plan The study enlists concepts and theories developed within the framework of contemporary analytic philosophy featured against the background of classical and contemporary bible commentary In addressing the biblical narrative through these perspectives this book holds appeal for scholars of a variety of disciplines bible studies philosophy religion and philosophical theology as well as for those who simply delight in reading the Bible

Intuition, Imagination, and Philosophical Methodology Tamar Szabó Gendler, 2013-07-18 Tamar Gendler draws together in this book a series of essays in which she investigates philosophical methodology which is now emerging as a central topic of philosophical discussions Three intertwined themes run through the volume imagination intuition and philosophical methodology Each of the chapters focuses in one way or another on how we engage with subject matter that we take to be imaginary This theme is explored in a wide range of cases including scientific thought experiments early childhood pretense thought experiments concerning personal identity fictional emotions self deception Gettier cases and the general relation of conceivability to possibility Each of the chapters explores in one way or another the implications of this for how thought experiments and appeals to intuition can serve as mechanisms for supporting or refuting scientific or philosophical claims And each of the chapters self consciously exhibits a particular philosophical methodology that of drawing both on empirical findings from contemporary psychology and on classic texts in the philosophical tradition particularly the work of Aristotle and Hume By exploring and exhibiting the fruitfulness of these interactions Gendler promotes the value of engaging in such cross disciplinary conversations in illuminating philosophical issues

First Philosophy II: Knowledge and Reality - Second Edition Andrew Bailey, 2011-07-08 First Philosophy Knowledge and Reality brings together classic and ground breaking readings on epistemology and the philosophy of science Andrew Bailey s highly regarded introductory anthology has been revised and updated in this new edition The comprehensive introductory material for each chapter and selection remains and new sections on philosophical puzzles and paradoxes and philosophical terminology have been added New readings include Edmund Gettier on justified true belief Wesley Salmon on induction and

Helen Longino on feminist science The Biomimicry Revolution Henry Dicks, 2023-03-14 Winner 2024 Symposium Book Award Canadian Society for Continental Philosophy Modernity is founded on the belief that the world we build is a human invention not a part of nature The ecological consequences of this idea have been catastrophic We have laid waste to natural ecosystems replacing them with fundamentally unsustainable human designs With time running out to address the environmental crises we have caused our best path forward is to turn to nature for guidance In this book Henry Dicks explores the philosophical significance of a revolutionary approach to sustainable innovation biomimicry The term describes the application and adaptation of strategies found in nature to the development of artificial products and systems such as passive cooling techniques modeled on termite mounds or solar cells modeled on leaves Dicks argues that biomimicry typically seen as just a design strategy can also serve as the basis for a new environmental philosophy that radically alters how we understand and relate to the natural world By showing how we can imitate emulate and learn from nature biomimicry points us toward a genuinely sustainable way of inhabiting the earth Rooted in philosophy The Biomimicry Revolution has profound implications spanning the natural sciences design architecture sustainability studies science and technology studies and the environmental humanities It presents a sweeping reconception of what philosophy can be and offers a powerful new vision of terrestrial existence **Philosophy** James K. Dew, Jr., Paul M. Gould, 2019-04-02 Two experienced educators offer an up to date introduction to philosophy from a Christian perspective that covers the four major areas of philosophical thought epistemology metaphysics philosophy of religion and ethics Written from an analytic perspective the book introduces key concepts and issues within the main areas of philosophical inquiry in a comprehensive yet accessible way inviting readers on a quest for goodness truth and beauty that ultimately points to Jesus as the source of all
