Knox Automobile Company Ma Images Of America:

Mad for Speed Elsa A. Nystrom, 2013-06-06 This book covers Joan Newton Cuneo's life and her roles from 1905 to 1915 as the premier female racer in the United States and spokeswoman for women drivers and good roads. Beginning with her family history and marriage to Andrew Cuneo, it traces her life in New York society, the birth of her children, and Joan's growing interest in automobile touring and racing and partnership with Louis Disbrow, her racing mechanic. The book covers Joan's experiences in three Glidden Tours, including her notes on the 1907 tour, her first races, and her rivals. It also looks at the growth and change of automobile culture and the battles for control of racing among the American Automobile Association, the Automobile Club of America, and the American Automobile Manufacturers Association, which ended in banishing women racers shortly after Joan's greatest racing victories at New Orleans in 1909. The book then follows Joan's attempts to continue racing, the end of her marriage, her move to the Upper Peninsula, and her remarriage and death. The book also includes a chapter on her female rivals in racing and touring.

Knox Automobile Company John Y. Hess, 2000 The Knox Automobile Company was a pioneer in the automobile business in New England. The company's founder, Harry Austin Knox, was born in 1875 in the outskirts of Westfield and went to school at the Springfield Industrial Institute. His practical work was done at the Elektron Company, manufacturers of electric motors and elevators, conveniently located next to the school building. He graduated at the top of his class of twelve in 1894 and gave the graduation address. A few years later, Knox built his first three cars with the help of his former classmate Herman Farr. The two men returned to Springfield and talked Elisha Cutler into forming the Knox Automobile Company. The business started in 1899 with the manufacture of a three-wheeled vehicle with a six-horsepower air-cooled engine. There was no reverse on the transmission as the vehicle could turn a nine-foot circle. The three wheelers were sold for cash right from the factory door. Though Knox had only a trade school education, he was an engineering genius. The company built everything from three wheelers to tractors, buses, and the ultimate six-cylinder closed car with a 65-horsepower water-cooled engine. The powerful six-cylinder cars won many hill climbs and races. Beginning in 1906, Knox built fire engines that made Springfield the first motorized fire department in the country. The company went out of business in 1927 after building thousands of machines, some of which are seen in this book, beautifully restored.
