Atlas and Text of Corneal Pathology

and Surgery Boyd Samuel, Gutierrez Angela Maria, McCulley James P., Actualizaciones en el diagnóstico y tratamiento del queratocono Dra. Gracia Castro de Luna, Dr. Antonio Pérez Rueda, 2021-07-29 La importancia del diagnóstico y tratamiento precoz del queratocono viene dada por su alta incidencia y prevalencia en pacientes de temprana edad y su carácter evolutivo siendo la primera causa de trasplante de córnea en España. Además el sureste de la península ibérica es un área endémica de la enfermedad. La exposición a agentes alérgicos y a radiación ultravioleta podrían acelerar su aparición y progresión. En etapas avanzadas de la enfermedad existe un importante compromiso de la agudeza visual del paciente afectando gravemente a la calidad de vida del mismo. Existen una gran cantidad de tratamientos que han demostrado frenar la evolución de la enfermedad: crosslinking y mejorar la calidad visual de los pacientes: anillos corneales intraestromales los cuales podrían evitar la realización final de una queratoplastia. El estudio mediante topografía corneal de estos pacientes es imprescindible para realizar un diagnóstico precoz y evitar cirugías refractivas corneales futuras. Es de gran interés conocer las normas básicas de interpretación de la topografía corneal y los índices diagnósticos de queratocono que ayudarán a anticiparse al diagnóstico en etapas clínicas. En este libro se presentan los últimos avances en el diagnóstico y tratamiento del queratocono.

Distrofías y Degeneraciones Corneales Samuel Boyd, 2012-11 Esta publicación es un texto práctico y útil que ayudará a comprender mejor las patologías corneales así como el planeamiento ya sea terapéutico o quirúrgico. El estudio de esta entidad es verdaderamente fascinante ya que por su relativa poca incidencia en la población muchas veces se carece de la experiencia a la hora de diagnosticarlas e identificarlas apropiadamente.

Atlas y Texto de Patología y Cirugía Corneal Samuel Boyd, 2012-10 Lo último en el manejo clínico y quirúrgico de las enfermedades corneales ha sido presentado en este Volumen. Temas esenciales sobre Infecciones e Inflamaciones Corneales y Desórdenes de la Superficie Ocular tales como conjuntivitis bacteriana y viral, queratitis bacteriana y no bacteriana, procedimientos diagnósticos en las Queratitis infecciosas, etiología y manejo del ojo seco, deficiencia lagrimal acuosa y síndrome Sjögren, epifora, blefaritis crónica y epiescleritis, etiología y manejo del pterigium, afecciones de la córnea relacionadas con los lentes de contacto.

Keratoconus Jorge L. Alió, 2016-12-28 As a degenerative disorder of the eye keratoconus can cause substantial distortion of vision with multiple images, streaking and sensitivity to light all reported by patients. Keratoconus: Recent Advances in Diagnosis and Treatment updates ophthalmologists about the innovations that have occurred within the last decade, discussing the diagnostic imaging techniques that have been developed for keratoconus diagnosis, understanding of how examination techniques are related to the evolution of keratoconus and how to indicate the different therapeutic tools that have been created for keratoconus over the last several years. Additionally, fundamentals for new diagnostic elements based on the mathematical, physical and biomechanical data are analyzed in depth for a better understanding of the essential diagnostic steps for the clinician to guide patients towards the most adequate therapeutic tool in the case. Modern keratoplasty techniques assisted by femtosecond lasers or other devices are also covered and these techniques along with the emerging conservative treatments

have added to more precise control of the evolution of the disease
