Making Sense of Sports Ellis Cashmore, 2010-09-13 Ellis Cashmore's unique multidisciplinary introduction to the study of sport in its cultural context reaches its fifth edition which comes enhanced with new chapters, new features and access to a new online resource center. New material includes discussions of Islam, exercise, culture, sports management and the morality of sport. The addition of self-assessment tests, PowerPoint presentations, glossary and original podcasts of the author in conversation with leading scholars of sport supplement the book's value as a teaching instrument.

Sport, Rules and Values Graham McFee, 2004-07-31 *Sport Rules and Values* presents a philosophical perspective on issues concerning the character of sport. Discussion focuses on three broad uses commonly urged for rules to define sport, to judge or assess sport performance and to characterize the value of sport, especially if that value is regarded as moral value. In general, *Sport Rules and Values* rejects a conception of the determinacy of rules as possible within sport and a parallel picture of the determinacy assumed to be required by philosophy. Throughout the presentation is rich in concrete cases from sport including cricket, baseball, American football, soccer and ice skating. Detailed consideration of some ideas from classics in the philosophy of sport, especially writings by Bernard Suits and William Morgan, contextualizes this discussion. Overall, this work exemplifies the dependence of philosophical considerations of sport on ideas from philosophy more generally. Thus it sketches, for example, the contrast between rules and principles, an account of the occasion sensitivity of understanding and the place of normative and motivating reasons within practical reasoning. *Sport Rules and Values* represents a distinctive conception both of sport and of its philosophical investigation which will appeal to all those with an interest in philosophy and ethics of sport.

Ethics, Knowledge and Truth in Sports Research Graham McFee, 2009-12-16 In this groundbreaking study, Graham McFee argues that sound high-level research into sport requires a sound rationale for one's methodological choices and that such a rationale requires an understanding of the connection between the practicalities of researching sport and the philosophical assumptions which underpin them. Drawing on a wide range of examples from the laboratory to the sports field, McFee explores the concepts of knowledge and truth in sports research and makes a powerful case for a philosophical deepening of our approach to method and methodology in sport. This book is important reading for all advanced students and researchers working in sport, exercise and related disciplines.

An Absence of Competition Neil Longley, 2013-12-11 This book takes a multi disciplinary approach to analyzing the nature of competition and competitive advantage within the U S pro sport industry By

many measures the four major pro sports leagues in the U S the National Football League NFL National Basketball Association NBA National Hockey League NHL and Major League Baseball MLB are now some of the most successful business entities in the country While these established leagues have generally been highly profitable throughout their respective existences the past two decades have been particularly lucrative with franchise values in all four leagues growing rapidly and at levels well beyond market rates of return Within this context the book seeks to explore the nature of the competitive advantage that these leagues apparently possess The purpose is to identify not only how these leagues have been able to get to where they are today but also to examine the competitive threats and opportunities that these leagues face as they move forward A key contribution of the book is that it analyzes these issues from a multi disciplinary approach including a traditional economics perspective public policy and public choice theory and strategic management to provide a parallel explanation for the success of each of the four major leagues It argues that no single conceptual approach can in itself adequately explain the full richness of the issue Its stresses that these various approaches should generally be viewed as complements rather than as being mutually exclusive and that a full understanding of the issue requires one to adopt a multi disciplinary perspective making it of interest to scholars in strategic management sport management and economics It can serve as an effective teaching tool in both graduate and upper level undergraduate courses for students in these fields and is particularly useful for faculties seeking to emphasize to their students the importance of a multi disciplinary integrative approach when analyzing business and management issues The book may also be of interest to leaders within the sport industry itself and will help to provide insight and perspective as leagues seek to enhance their competitive advantage in the marketplace

Belief's Own Ethics Jonathan E. Adler,2006-01-20 The fundamental question of the ethics of belief is What ought one to believe According to the traditional

view of evidentialism the strength of one's beliefs should be proportionate to the evidence. Conventional ways of defending and challenging evidentialism rely on the idea that what one ought to believe is a matter of what it is rational, prudent, ethical or personally fulfilling to believe. Common to all these approaches is that they look outside of belief itself to determine what one ought to believe. In this book Jonathan Adler offers a strengthened version of evidentialism arguing that the ethics of belief should be rooted in the concept of belief that evidentialism is belief's own ethics. A key observation is that it is not merely that one ought not but that one cannot believe for example that the number of stars is even. The cannot represents a conceptual barrier not just an inability. Therefore belief in defiance of one's evidence or evidentialism is impossible. Adler addresses such questions as irrational beliefs, reasonableness, control over beliefs and whether justifying beliefs requires a foundation. Although he treats the ethics of belief as a central topic in epistemology, his ideas also bear on rationality, argument and pragmatics, philosophy of religion, ethics and social cognitive psychology.
