Knowledge Of Life Forms Of Living:

In Search of Living Knowledge Marja-Liisa Swantz, 2016-01-01 Marja Liisa Swantz has spent a lifetime conducting participatory action research in Tanzania and *In Search of Living Knowledge* encapsulates her reactions. She started her career in 1952 in Tanganyika as an instructor to the first generation of women teachers at Ashira Teachers Training College situated on the slopes of Mount Kilimanjaro. In the first years of Tanzania's independence from Britain she devoted five years 1965-1970 to participant research in a coastal Zaramo village near the capital city of Dar es Salaam. The research culminated in her book *Ritual and Symbol in Transitional Tanzanian Society* and a doctorate in Anthropology of Religion which she received from the Swedish University of Uppsala in 1970. The author further developed the Participatory Approach to research while serving as a Senior Research Fellow at the University of Dar es Salaam from 1972 to 1975. After becoming a lecturer at the University of Helsinki she continued to develop Participatory Action Research with Tanzanian and Finnish doctoral candidates in a project in Bagamoyo, Tanzania known as Jipemoyo. She continued to apply the participatory approach in research projects as Director of the Institute of Development Research at the University of Helsinki where she taught anthropology and as a Senior Researcher at the World Institute for Development Economics Research Institute in Helsinki in the 1980s. Since retirement the author has continued her research writing and participation in development projects in Tanzania including projects in Mtwara and Lindi from 1992 to 1998 and for 12 years while involved in a Local Government Cooperation project between Hartola in Finland and Iramba in Tanzania.

The Life and Behavior of Living Organisms

Elliott Jaques, 2001-12-30 Jaques presents a totally new general theoretical foundation for understanding the individual and social behavior of all living organisms. In contrast to existing theories of behavior which are static, Jaques has succeeded in breaking through to a truly dynamic orientation. This breakthrough resulted from his fundamental research into work organizations that led to the realization that the difference between inanimate processes and all living behavior is that all living behavior is composed of intentional goal directed work. This continuous work entails the use of judgment in choosing goals and in making the decisions necessary to get to these goals. This work process is the same in all living organisms including humans. It is an ineffable process of the total organism inaccessible to direct observation and experience. Intentionality is the dynamic of behavior. This discovery has led over the past 50 years to extensive discoveries: objective measures of work complexity and of the level of complexity capability of individuals in all species; how human language differs from communication in other species; the need to distinguish between horizontal evolutionary mutations within a given level of capability and vertical evolution to species with higher levels of complexity; the nature of freedom within mutual trust inducing constraints. Set forth to radically change the nature of all behavioral and social sciences in the new millennium, Jaques' analysis is essential reading for all scholars, students and researchers as well as the general public involved with the behavior of living organisms.
