International Accounting/Financial Reporting Standards Guide 2009 David Alexander, Simon Archer, 2008-11 Understanding reporting standards issued by the IASB is essential for those who prepare and or interpret financial statements and are required to comply with the increasingly complex set of international accounting and financial reporting standards The International Accounting Financial Reporting Standards Guide is your survival handbook in today's global economy It keeps you up to date on the latest general and industry specific international reporting standards and the proposed changes on your immediate horizon that will most likely alter the way in which you must account for and disclose information

would be an immensely useful referencer for professionals practitioners and corporates Key features To simplify the reading experience the chapters include a brief easy to understand summary of the relevant topic followed by Frequently Asked Questions FAQs on the chapter Covers examples based illustrations of complex topics Covers case studies on hedge accounting with journal entries guidance for hedge documentation and effectiveness testing Includes real life extracts of disclosures of financial instruments Covers the amendment related to LIBOR and other interbank offered rates IBORs issued by the Ministry of Corporate Affairs vide Companies Indian Accounting Standards Amendment Rules 2020 on 24 July 2020 Covers key implications of Ind AS under Companies Act 2013 About the book *International Financial Reporting Standards (IFRS) Workbook and Guide* Abbas A. a quarter more looking to IFRS for further guidance where their local standards do not provide enough guidance Given the varied mandates and types of policy operations undertaken by central banks there also exists significant variation in practice style and the extent of the financial disclosures in both the primary statements and in the note disclosures By their nature central banks are unique in their jurisdiction and so do not always have local practices and examples they can follow Although the major accounting firms have created model disclosures intended for commercial banks these are often not totally appropriate for a central bank The application of IFRS across central banks differs based on the mandate of the central bank and the capacity of the accounting profession in the specific jurisdiction An analysis of international practices such as those undertaken in preparing these model statements may help address questions about the structure of the statements themselves as well as the organization of the note disclosures As a consequence each central bank following IFRS has largely developed its own disclosures with only limited reference to others Input from the external auditors has been significant but some of this has been determined by the approach used by the specific auditor s style for commercial banks rather than central banks Auditors do not always fully appreciate the differences between a commercial bank and a central bank which has a different role and undertakes transactions to meet its policy objectives This has often led to an over emphasis of items not material in the context of a central bank and insufficient disclosures on operations or accountabilities specific to the functions of the central bank
