Crypto Asset Investing in the Age of Autonomy Jake Ryan, 2020-12-03 Competition the drive for efficiency and continuous improvement ultimately push businesses toward automation and later towards autonomy If a business can operate without human intervention it will minimize its operational cost If Uber can remove the expense of a driver with an autonomous vehicle it will provide its service cheaper than a competitor who can't If an artificially intelligent trading company can search find and take advantage of some arbitrage opportunity then it can profit where its competitors cannot A business that can analyze and execute in real time without needing to wait for a human to act is a business that will be able to take advantage of brief inefficiencies from other markets or businesses This trend following a thesis that is based on 100 years of proven economic theory Short wave economic cycles those 5 to 10 year cycles are driven by credit but the long wave economic cycles those 50 to 60 year cycles are driven by technological revolution We've had 5 cycles over the past 200 years with the last wave the Age of Information Telecommunications We've seen evidence that a new cycle has begun Technological revolutions come by way of a cluster of new innovations About a decade ago you started to see AI robotics and

IoT sensors delivering on automation That s been powerful but not transformational It does not force businesses to fundamentally change how they do business The last piece of the puzzle was cryptocurrency because it allows us to process and transfer economic value without human intervention Soon there will be a global race to build autonomous operations Businesses and organizations without autonomous operations simply will not be able to compete with those that do because autonomy is the ultimate competitive advantage Crypto is the mechanism that will accrue value from being the infrastructure for the next digital financial revolution Crypto Asset Investing lays out a case that we ve begun a new technological revolution similar to the Internet Age of the 1990 s Artificial intelligence the Internet of Things robotics and cryptocurrency are converging to deliver on a new age what I call the Age of Autonomy Understanding the transformation that s taken place before anyone else can yield enormous investment opportunity In this book you ll learn how and why to invest in crypto assets *Handbook of Climate Change Mitigation and Adaptation* Maximilian Lackner, Baharak Sajjadi, Wei-Yin

Younce., 2022-08-03 Mankind is at a crossroads Our social systems are breaking down because we ve lost touch with our ecological position in the natural world We ve become utterly distracted by the fast paced demands of daily life to the point where we ve lost track of who we are We ve forgotten how to work as a team and nurture the partnerships that helped us be who we are today Our neglected partnerships and abusive attitude toward our homeland reflect a mass symptom of

ignorance that begs me to question the sanity of modern culture Our inability to apply our attention to our intention has placed our species into vulnerable territory Nature beckons us to wake up and remember who s in charge The research explored throughout this book is based on the personal evolutionary process of creativity our way of relating to the world The reason this exploration is so personal is that it deals with the universal qualities of consciousness as experienced uniquely by each individual on a subjective level Thus the theme of this project is to identify the objective aspect of evolving human consciousness by means of cognitive liberation This quest is meant to address the peculiar problems of the unconscious and subconscious that shape ordinary experiences This book considers consciousness as the locus of evolutionary change What does it mean to be free from insecurity to not get caught up in the trap of our minds and carried away from what truly matters in life Cognitive Liberty offers our bodies and minds a resolution to our being and embrace life as a journey on its own terms It s a friendly reminder that we re part of a learning process in constant stages of development and indeterminism The more we re able to have fun with the process the greater the freedom we experience in return **Bamn** Clyde C.
