Guide to Microforms in Print ,1987 **EU Cartel Enforcement** Andreas Scordamaglia-Tousis,2013-08-01 There has been a long standing debate on the compatibility of EU competition law with fundamental rights protection particularly as the latter is enshrined in the due process requirements of the European Convention on Human Rights ECHR This book a signal contribution to that debate assesses two questions of paramount concern first whether the current level of fundamental rights protection in cartel enforcement falls within the accepted ECHR standards and second how the often conflicting objectives of effectiveness and adequate protection of fundamental rights could optimally be achieved Following a detailed survey of relevant EU institutional substantive and procedural law rules the author offers a set of persuasive normative responses to both questions Proceeding from an in depth analysis of the pertinent rights and legal nature of competition proceedings under EU and ECHR law the author goes on to examine such elements of the perceived incompatibility as the following investigatory powers vested in competition authorities the privilege against self incrimination right to privacy fair trial probatory requirements degree of use of presumptions in EU practice Article 6 ECHR guarantees pertaining to the presumption of innocence proving coordination of competitive behaviour proving restriction of competition admissibility of evidence before EU Courts and the Commission assessment of the attribution of liability rules EU fining rules judicial review of cartel decisions by EU Courts and national sanctioning rules The author s extraordinarily thorough presentation is rounded off with a remarkably comprehensive bibliography that lists in addition to books and articles newspaper articles EU regulations and directives soft law guidelines and best practices EU and ECtHR case law EU Advocate General opinions European Commission decisions and European Ombudsman decisions General conclusions stress the necessity of introducing further reforms to enhance the effectiveness and legitimacy of fundamental rights in the context of competition proceedings Few books have taken such a thorough and far reaching approach to the reconciliation of effective public enforcement and fundamental rights or of effective deterrence with the principles of legality non retroactivity presumption of innocence and ne bis in idem In the depth of its appraisal of the entire spectrum of enforcement components from a fundamental rights perspective the book is without peers It will be warmly welcomed by any parties interested in the intersection of competition law and human rights **Willing's Press Guide and Advertisers' Directory and Handbook** ,1996 *Public Procurement and the EU Competition Rules* Albert Sánchez Graells,2011-01-29 Shortlisted for the 2012 Prix Vogel in Economic Law Public procurement and competition law are both important fields of EU law and policy intimately intertwined in the creation of the internal market Hitherto their close connection has been noted but not closely examined This new work is the most comprehensive attempt to date to explain the many ways in which these fields often considered independent of one another interact and overlap in the creation of the internal market In this process of convergence

between competition and public procurement law the need for this joint study is clearly apparent As such the book asks whether competition law principles inform or condition public procurement rules and whether they are adequate to ensure that competition is not distorted in markets where public procurement is particularly significant The book moves away from the classical focus of public procurement on the activities of private actors developing instead an analytical framework for the appraisal of the market behaviour of the public buyer from a competition perspective The analysis is both legal and economic Proceeding through a careful assessment of the general rules of competition and public procurement the book constantly tests the efficacy of the rules in competition and public procurement against a standard of the proper functioning of undistorted competition in the market for public procurement Guide économique Nord-Pas-de-Calais 2005 La Voix du Nord,,Collectif,2005-06-01 *EU Soft Law in the Member States* Mariolina Eliantonio,Emilia Korkea-aho,Oana Stefan,2021-03-25 This volume analyses for the first time in European studies the impact that non legally binding material otherwise known as soft law has on national courts and administration The study is founded on empirical work undertaken by the European Network of Soft Law Research SoLaR across ten EU Member States in competition policy financial regulation environmental protection and social policy The book demonstrates that soft law is taken into consideration at the national level and it clarifies the extent to which soft law can have legal and practical effects for individuals and national authorities The national case studies highlight the points of convergence or divergence in the way in which judges and administrators approach soft law while reflecting on the reasons for and consequences of various national practices A series of horizontal studies connect this research to the rich literature on new modes of governance by revisiting traditional theories on soft law and by reflecting on the potential of such instruments to undermine or to foster rule of law values **Copyright and Multimedia Products** Irini A. Stamatoudi,2001-11-08 Multimedia products have experienced tremendous market success Yet too often they are given inadequate protection under existing national and international copyright schemes Irini Stamatoudi provides a comprehensive comparative treatment of multimedia works and copyright protection in this clear and concise volume A detailed introduction outlines the nature of the multimedia work as well as the scope of existing legislation separate chapters consider collections and compilations databases audiovisual works and computer programs video games are here treated as a test case Stamatoudi then analyses issues of qualification regime of protection and offers a model for a European legislative solution Copyright and Multimedia Products will interest academics and students as well as practitioners and copyright policy makers **Bibliographic Guide to Government Publications--U.S.** New York Public Library. Research Libraries,1976 **Arbitrability** Fabien Gélinas,Leyla Bahmany,2023-11-17 As simple as the arbitrability question might appear namely what types of issues may and may not be submitted to arbitration for a legal system to set a clear and consistent approach to arbitration it must consider many complicated factors that relate to public policy and economic priorities as well as international relations This comprehensive precise and practical book identifies and analyzes

the fundamentals of and major approaches to arbitrability in the current international context The authors focus on nine major arbitration jurisdictions the United States Canada France England and Wales Switzerland Germany China Mainland Hong Kong and Singapore with meticulous attention to each jurisdiction's pertinent case law and legislative framework as well as relevant commentary For each jurisdiction the arbitrability of disputes in the following fields of law is discussed antitrust competition bankruptcy insolvency consumer corporate family domestic relations intellectual property copyright patent and trademark labor employment securities and torts Based on the jurisdiction by jurisdiction analysis the authors identify key areas in which the selected jurisdictions share similarities and evince differences with respect to each of the above mentioned fields With a structure that enables readers to easily locate what they are looking for and gives clear cut answers this unique book fully elucidates the notion of arbitrability by identifying the key concepts the applicable rules and different criteria for arbitrability and by explaining how different jurisdictions deal with specific types of disputes It will be welcomed by counsel arbitrators judges students and academics active in international arbitration and the enforcement of arbitral awards
