Guide To Cloud Computing For Business Owners:

A Quick Start Guide to Cloud Computing Mark I Williams, 2010-10-03 Cloud computing has caused a marketing fog confusing business executives seeking to understand the technology's potential applications and business benefits. A Quick Start Guide to Cloud Computing cuts through the industry hype and provides non-technical explanations about what it is and how it can improve your business. With case studies from large and small business, it shows how enabling a remote workforce and sharing resources can reduce your organisation's carbon footprint. It describes the benefits of cloud computing, how to choose the right supplier and technologies for your particular business, key security issues, and the perils and pitfalls to avoid. This Quick Start Guide puts business needs before technology, enabling you to make confident decisions about IT strategy, make the right choices for your business, and reject solutions that fix problems you don't have. *Cloud Computing for Business* Chris Brownlee, 2015-05-28 Gain a competitive advantage and join the technology revolution helping businesses grow. Discover how smart businesses are using cloud computing technology to slash IT costs, work more productively, and grow faster. This easy-to-understand guide to cloud computing for business shows you: How to stop firefighting IT problems and use technology to work more effectively; How you can work from anywhere safely and securely with your desktop at your fingertips; How to guarantee the security of your data and reduce the risk of hacker attacks; How to ensure your business never suffers data loss. Cloud computing expert and industry veteran Chris Brownlee presents the most readable business-friendly book on The Cloud ever written. Designed for business owners and entrepreneurs, *Cloud Computing For Business* explains the many benefits being realised by businesses across the globe from joining the cloud computing revolution. **Cloud Computing** Charles Henson, 2012-03-01 The reason I published this book was to fortify business owners and executives with the basic knowledge they need to make a great decision when choosing a Cloud Computing Integrator. I believe a qualified computer consultant can contribute to your business success just like a great marketing consultant, attorney, accountant, or financial advisor can. The technology industry is ever-changing and growing at such a rapid pace that most business owners can't keep up with all the latest whiz-bang gadgets, alphabet soup acronyms, and choices available to them. Plus many of the latest and greatest technological developments have a shelf life of six months before they become obsolete or completely out of date. Sorting through this rapidly moving mess of information to formulate an intelligent plan for growing a business requires a professional who not only understands technology and how it works but also understands how people and businesses need to work with technology for progress. Unfortunately, the complexity of technology makes it easy for a business owner to fall victim to an incompetent or dishonest computer consultant. When this happens, it creates feelings of mistrust toward all technology consultants and vendors, which makes it difficult for those of us striving to deliver exceptional value and service to our clients. Therefore, my purpose is to not only give you the information you need to find an honest, competent computer consultant but in doing so, to raise the standards and quality of services for all consultants in my

industry I certainly want your feedback on the ideas in this book If you choose a Cloud Integrator as I've outlined and they work please send me your story If you've had a bad experience I want to hear those horror stories as well If you have additional tips and insights that we haven't considered please share them with me I might even use them in a future book Again the more aware you are of what it takes to find and hire great consultants in every aspect of your business not just technology the stronger your business will become I am truly passionate about building an organization that delivers uncommon service to my clients I want to help business owners see the true competitive advantages technology can deliver to your business and not just view it as an expensive necessity and source of problems
