Healing Cancer Heart Disease Depression:

Alternative Healing in American History Michael Shally-Jensen, 2019-07-19 This book examines alternative healing practices in American popular culture. From traditional folk approaches to more recent developments, it discusses the rise and fall of more than 100 popular approaches to addressing both physical ailments and mental health needs. Offering insightful accounts of everything from aging prevention to voodoo, *Alternative Healing in American History: An Encyclopedia* from Acupuncture to Yoga situates each popular approach in the history and culture of health and wellness in America. Moreover, the book shows that orthodox medicine and unconventional approaches may have more in common than many people think because both are subject to the changing nature of the medical understanding and the strength of their appeal to consumers. While the main focus is on remedies lying outside the medical mainstream, the book also highlights how many widely accepted therapeutic treatments of the past, for example, the water cure, hydrotherapy, or lobotomy, psychosurgery, fell out of favor and were quickly forgotten. Besides examining popular healing techniques, the book also explores the changing nature of the medical marketplace and how once standard treatments, e.g., leeching, psychoanalysis, have had their ups and downs. The book comprises five chronological sections covering time periods from pre 1900 to the present.

Healing Bodies and Souls W. Daniel Hale, Harold George Koenig, As healthcare leaders widely recognize, churches are second homes to their members and ideally situated indeed called to serve their communities with the loving and personal care that a stressed healthcare system cannot deliver. Daniel Hale and Harold Koenig, national leaders in health ministries, offer a practical and engaging primer on developing a variety of initiatives for all who are concerned and interested: pastors, parish nurses, lay leaders, and concerned parishioners. Their short volume mixes real-life congregational case studies with vital information to equip congregants in helping people manage illness, navigate the healthcare labyrinth, avoid or manage disability, and even provide some life-saving and preventative medical services. While their case studies report on the many kinds of engagement congregations have taken on, each chapter also provides basic information on the most common healthcare challenges: diabetes, skin cancer, stroke, heart disease, Alzheimer's, Parkinson's, breast cancer, prostate cancer, glaucoma, and depression, and what can be done in local congregations.
