Health Psychology Regan A. R. Gurung, 2023. Material Discourses of Health and Illness Lucy Yardley, 2013-01-11. Material Discourses of Health and Illness applies discursive approaches to the field of health psychology in stark contrast to the biomedical model of health and illness. The discursive approach uses the person's experience and feelings as the central focus of interest, whereas the more traditional models regarded these as coincidental and relatively unimportant. The book provides an accessible and compelling introduction to social constructionist and discursive approaches to those with limited previous knowledge of socio-linguistic theory and research. It provides practical examples of how these approaches can be applied to the field of health psychology with a collection of sophisticated discursive analyses which demonstrate the distinctive contribution that can be made by psychologists to a field that has been largely dominated by sociologists and anthropologists.

Integrating Psychotherapy and Psychophysiology Patrick Steffen, Donald Moss, 2024-05-08. In recent years, there has been growing interest in exploring how psychophysiology can be used to enhance psychotherapeutic interventions, and it is becoming more common for psychotherapists to use psychophysiological approaches such as biofeedback as a part of their therapy. *Integrating Psychotherapy and Psychophysiology* explores how these fields can be integrated to improve therapy outcomes and to provide a guide to professionals in the field. Structured in three parts, the first part focuses on theories underlying psychotherapy, psychophysiology, integration with chapters on the neuroscience of mind, evolution, and compassion, heart rate variability, and mind-body integration and affect, and understanding the world. The second part focuses on assessment aspects of psychotherapy, psychophysiology, integration with chapters on the NIH Research Domain Criteria (RDoC) approach to assessment of psychopathology from a psychophysiological perspective, personality as a central factor in stress and cardiovascular reactivity, and using the RDoC framework to understand and conceptualize personality. Finally, the third part focuses on approaches to integrating psychophysiology into psychotherapy, emphasizing heart rate variability, biofeedback. The book will be valuable for all psychotherapists who are looking to improve their practice by integrating effective mind-body principles into their therapeutic approach.
