

What is a report?

A report is a structured and formal document that is used to convey information, findings, analysis, and recommendations to a specific audience. Reports are typically used in academic, scientific, technical, and business contexts to communicate the results of research, investigations, or assessments.

A report typically includes several sections such as an executive summary, an introduction, a methodology, findings, analysis, conclusions, and recommendations. Reports may also include tables, charts, graphs, and other visual aids to help convey information effectively.

The purpose of a report is to provide the reader with information and analysis that they need to make informed decisions or act based on the report's findings. A well-written report should be clear, concise, and organized, and should be tailored to the needs and expectations of its intended audience.
