Health Migration And Returna Handbook For A Multidisciplinary Approach:

Health, Migration and Return:A Handbook for a Multidisciplinary Approach Peter Van Krieken,2001-03-07 The North is being increasingly confronted with a new phenomenon of migration the so called health tourism of irregular migrants One can already recognize a tendency among would be migrants who either overstay their visas or arrive under the pretext of being asylum seekers to come to the North with the intention of receiving medical treatment in particular complicated surgery or other expensive forms of treatment which they cannot get in their countries of origin certainly not free of charge Moreover many others use illness as a pretext or a reason for not being returned or to obtain leave of stay In this respect one needs to take into account that public health services in most Western European and North American countries are already overloaded as a consequence of modern medical developments but also in view of the general increase in the percentage of old people among the population Inmany countries there are long waiting lists for non urgent operations and contributions to health systems have to be constantly increased in order to cover the extensive costs of modern medical treatment

Migration in South and Southern Africa Pieter Kok (Zuid-Afrika.),2006 Covers three broad areas macro level migration trends in sub Saharan Africa micro level factors in South African migration and a synthesis of current migration theory

Transnational Mobility and Global Health Peter H. Koehn,2018-09-05 Transnational Mobility and Global Health spotlights the powerful and dynamic intersections of human movement inequality and health The book explores the interacting political economic social cultural and climatic drivers of health and migration proposing innovative ways to enhance global health and care provision in an era of transnational mobility As health security continues to rise up the agenda in international politics the book also analyses the political determinants of health and migration Within the framework of key drivers of unequal mobilities this book treats interconnected health and migration themes not covered elsewhere under one cover health tourism conflict induced and other vulnerable population movements humanitarian crises human rights the health development linkage migrant health care and health competency education The book also considers global health vulnerabilities in the wake of climate change and the biomedical ethical and governance challenges of emerging and reemerging infectious diseases Finally the book suggests ways of evaluating mobility influenced health outcomes and equity impacts and explores how the global circulation of health expertise could help to rectify care provider shortages The challenges to global health considered in this book are only likely to become more intense as the 21st Century surge in transnational migration continues Readers will gain interdisciplinary appreciation for the relevance of health for migration and of migration for global health Researchers students practitioners and policy makers interested in individual and population health sustainable development and migration studies will find this book a useful and inspiring guide to contemporary global challenges

Global Politics of Health Sara Davies,2010-02 International responses to the outbreak of SARS the spread of HIV AIDS and the promotion of health as a human right all demonstrate how global politics have a

profound effect on the way we think about and respond to major health challenges Despite a growing interest in the relationship between health and international relations there has yet to be a systematic study of the links between them Global Politics of Health aims to fill this gap ultimately showing how world politics can be good or bad for your health This book calls for a more nuanced understanding of the nature of the current global health crisis and the political dilemmas faced by those responsible for the development and implementation of responses to it By charting these debates and showing how they shape the way actors think about key issues relating to health such as people movement infectious disease the business of health and the consequences of war this volume provides an innovative and comprehensive introduction to health and international relations for students of global politics health studies and related disciplines Needed basic research in "Migration and health" 2002-2006 in Switzerland Jenny Maggi,2003 **Health Care Law-making in Central and Eastern Europe** André den Exter,2002 This book examines the relevance of a theoretical model of health care lawmaking in several Central Eastern European countries Confronted with the legacy of the ancient regime the countries selected shifted away from a socialist model towards a more market oriented health care system From a legal perspective this change of system imposed on government the need for drastic reforms starting with the introduction of a compulsory health insurance scheme based on the notion of solidarity Future accession to the EU requiring the incorporation of the *acquis communautaire* has increased the complexity of legal reforms since Strengthening the reform process the author developed a method of law making based on legaltheoretical understanding Case study research in three selected countries justifies the conclusion that the analytical model rationalises the law making activity including the EU law approximation process What is more it became apparent that the importance of this theoretical model is not restricted only to the selected countries but may also be a valuable instrument for other countries in transition in the region Health care law making in Central and Eastern Europe Review of a legal theoretical model provides a unique resource for scholars and policy makers interested in legal reforms in Central Eastern European health care systems Public Health Pranee Liamputtong,2019-05-16 Provides students with an overview of Australian and international public health issues and contexts *Handbook of Research on Socio-Economic Sustainability in the Post-Pandemic Era* Oleński, Jozef,Sachs, Jeffrey,Susai, Masayuki,Tsekouras, Yannis,Gjonça, Arjan,2023-08-18 The COVID 19 pandemic intensifies underlying structural obstacles and systemic inefficiencies However it also provokes the accelerated adoption of innovations made possible by the already growing technological development before being accompanied by necessary institutional and systemic adjustments This leads to multidimensional crises while also opening new socio economic challenges and prospects globally The Handbook of Research on Socio Economic Sustainability in the Post Pandemic Era engages global aspects of the crisis by means of standard and innovative economic policies at the national and international level It confronts the challenges facing businesses and reveals models of effective transformations and strategies in the present circumstances The book further investigates individual and collective societal

challenges in light of sustaining our constantly upgrading humanitarian values in the 21st century Covering topics such as fiscal adjustment measures sustainable marketing and state society relations this major reference work is a dynamic resource for government officials sociologists economists business leaders human resource managers libraries students and faculty of higher education researchers and academicians
