Understanding the CDM 2007 Regulations demonstrates the rationale behind the regs, covers the duties of the five core duty holders: client, CDM coordinator, designer, principal contractor and contractor, explains the importance of the hazard management process on every project and also sets out the consequences of failing to successfully plan, design and manage for safety. Any client, architect, engineer, CDM coordinator, project manager, construction professional or student will find this a simple but thorough and dependable guide and should value the management toolkit and the numerous practical examples of best practice and guidance on how to use the Approved Code of Practice appropriately.
