Regoverning Markets Bill Vorley, Andrew Fearn, Derek Ray, 2016-04-08 The internationalisation of food retailing and manufacturing that has swept through the agri food system in industrialised countries is now moving into middle and low income countries with large rural populations causing significant institutional changes that affect small producer agriculture and the livelihoods of rural communities the world over Farmers and policy makers are struggling to keep up with the wave of new demands being made on their supply chains by food manufacturers and retailers In the process new questions and challenges are arising Can small scale farmers organise to meet the demands of corporate giants Should governments liberalise Foreign Direct Investment in the retail sector and expose numerous small shops to competition from multinationals Can distribution systems be adapted to make

markets work better for the poor This book offers a contemporary look at what happens when the modernisation of food supply chains comes face to face with the livelihoods of rural and poor people The authors are drawn from eighteen countries participating in the Regoverning Markets programme which aims to not only improve our understanding of the way modernisation and re structuring of food supply chains is affecting food production and distribution systems but also identify best practice in involving small scale producers in supermarket supply chains and ascertain the barriers to inclusion which need to be removed The book is aimed primarily at academics but will also appeal to practitioners in developing countries civil servants policy makers and NGOs

Rabies in the Streets Deborah Nadal,2020-04-13 Found in two thirds of the world rabies is a devastating infectious disease with a 99.9 percent case fatality rate and no cure once clinical signs appear Rabies in the Streets tells the compelling story of the relationship between people street animals and rabies in India where one third of human rabies deaths occur Deborah Nadal argues that only a One Health approach of interspecies camaraderie can save people and animals from the horrors of rabies and almost certain death Grounded in multispecies ethnography this book leads the reader through the streets and slums of Delhi and Jaipur where people and animals such as dogs cows and macaques interact intimately and sometimes violently Nadal explores the intricate web of factors that bring humans and animals into contact with one another within these urban spaces and create favorable pathways for the transmission of the rabies virus across species This book shows how rabies is endemic in India for reasons that are as much social cultural and political as they are biological ranging from inadequate sanitation to religious customs from vaccine shortages to reliance on traditional medicine The continuous emergence and reemergence of infectious diseases despite technical medical progress is a growing concern of our times and clearly questions the way we think of animal and environmental health This original account of rabies challenges conventional approaches of separation and extermination arguing instead that a One Health approach is our best chance at fostering mutual survival in a world increasingly overpopulated by humans animals and deadly pathogens

Race and the Origins of American Neoliberalism Randolph Hohle,2015-06-12 Why did the United States forsake its support for public works projects public schools public spaces and high corporate taxes for the neoliberal project that uses the state to benefit businesses at the expense of citizens The short answer to this question is race This book argues that the white response to the black civil rights movement in the 1950s 60s and early 70s inadvertently created the conditions for emergence of American neoliberalism Neoliberalism is the result of an unlikely alliance of an elite liberal business class and local segregationists that sought to preserve white privilege in the civil rights era The white response drew from a language of neoliberalism as they turned inward to redefine what it meant to be a good white citizen The language of neoliberalism depoliticized class tensions by getting whites to identify as white first and as part of a social class second This book explores the four pillars of neoliberal policy austerity privatization deregulation and tax

cuts and explains how race created the pretext for the activation of neoliberal policy Neoliberalism is not about free markets It is about controlling the state to protect elite white economic privileges

spirit or not by reviewing operational performance of APSRTC and its financial function This work is not only an in depth study of HRD practices in APSRTC the study also presents an overview of the road transport sector in India With the advent of globalization transport sectors are confronted with challenges in improving productivity by successfully meeting the intense level of competition from its counterparts Business today is in a period of change and uncertainty The success will largely depend on how these challenges are matched with the utilization of human resources that is at our disposal It has been very unfortunate that the APSRTC has limited its human resource developmental practices for some cadres at apex level only without taking organizational climate of various zones into account while training their managerial personnel But the need of the hour is to put more emphasis on all the HRD practices at managerial level in the background of their level of climate The researcher looks at the problems of implementing HRD practices in the context of changing technological advancement and government policies Energy Abstracts for Policy Analysis ,1987-07 *Pollution* R M Harrison,2015-11-09 Twenty years on from the first edition of *Pollution* and the topic remains high in the public awareness Environmental pollution is now a major area of research consultancy and technological development and is a priority for the political agendas of both the developed and developing worlds The fifth edition of this book is fully updated and includes an entirely new chapter on Climate Change presenting an authoritative view on this topic Chapters in fast moving areas have been completely revised and several newcomers have joined the original set of authors This popular book has proved invaluable as a teaching resource for two decades and is frequently used as a reference by practitioners in the field Readers of earlier editions will benefit from updates on technologies such as nanoscience and the legislative changes that have occurred since the fourth edition in 2001
