The Body of Nature and Culture R. Giblett,2008-10-14 This book explores the relationship of human bodies with natural and cultural environments arguing that these categories are linked and intertwined It argues for an environmentally sustainable and healthy relationship between the body and the earth Black Swan Song Rod Giblett,2021-05-06 Combining memoir and studies in the Environmental Humanities Black Swan Song weaves together an autobiographically based account of the unique life and work of Rod Giblett For over 25 years he was a leading local wetland conservationist environmental activist and pioneer transdisciplinary researcher and writer of fiction and non fiction He has researched written and published more than 25 books in the environmental humanities especially wetland cultural studies and psychoanalytic ecology Black Swan Song traces Rod s early and later life and work from being born in Borneo as the child of Christian missionaries through his childhood in Bible College being a High School dropout and studying at three universities to becoming an academic activist and author and now a writer Following in the footsteps of New Lives of the Saints Twelve Environmental Apostles Black Swan Song also comprises conversations in conservation counter theology between the twelve

minor biblical prophets and twelve environmental apostles such as Henry David Thoreau Aldo Leopold John Muir and Rachel Carson It also introduces the lives and works of twelve more environmental apostles such as John Clare Rebecca Solnit John Charles Ryan and others who have made a valuable contribution to green thinking and living Black Swan Song mixes modes and genres such as memoir essay story criticism etc making up the writer s black swan song It provides ways of living and being with the earth in dark and troubled times by providing resources of a journey of hope for learning to live bio and psycho symbiotic livelihoods in bioregional home habitats of the living earth and in the Symbiocene the hoped for age superseding the Anthropocene **Environmental Humanities and the Uncanny** Rod Giblett, 2019-04-12 Sigmund Freud s essay The Uncanny is celebrating a century since publication It is arguably his greatest and most fruitful contribution to the study of culture and the environment Environmental Humanities and the Uncanny brings into the open neglected aspects of the uncanny in this famous essay in its centenary year and in the work of those before and after him such as Friedrich Schelling Walter Benjamin E T A Hoffmann and Bram Stoker This book does so by focusing on religion especially at a time and for a world in which some sectors of the monotheisms are in aggressive and sometimes violent contention against those of other monotheisms and even against other sectors within their own monotheism. The chapter on Schelling's uncanny argues that monotheisms come out of polytheism and makes the plea for polytheism central to the whole book It enables rethinking the relationships between mythology and monotheistic and polytheistic religions in a culturally and politically liberatory and progressive way Succeeding chapters consider the uncanny cyborg the uncanny and the fictional and the uncanny and the Commonwealth concluding with a chapter on Taoism as a polytheistic religion Building on the author s previous work in Environmental Humanities and Theologies in bringing together theories of religion and the environment this book will be of great interest to students and scholars of the environmental humanities ecocultural studies and religion

New Lives of the Saints Rod Giblett, 2019-11-13 Presented here for the first time and for meditation and emulation are the words and work of many environmental apostles. The words and work of each apostle are designed to delight and inspire the reader to begin or continue to lead a life of environmental action for conservation and contemplation of nature for spiritual succor in the age of climate change All the usual suspects are here such as St Francis Rachel Carson Aldo Leopold John Muir Henry David Thoreau and Judith Wright but New Lives of the Saints emphasizes some aspects of their words and work often ignored or overlooked such as Thoreau on swamps and Leopold on marshes Also included are some unusual and unexpected environmental apostles such as Walter Benjamin Raymond Williams Seamus Heaney and Paul Virilio all of whom contributed to green thinking as this book shows Other environmentally apostolic writers such as Walt Whitman Sidney Lanier Lord Dunsany H P Lovecraft Felix Guattari and Kelly Barnhill are also discussed Beginning with two environmentally and animal friendly retellings of the legends of St George and St Margaret involving dragons the book goes on to devote a chapter each to ten other environmental apostles as patron saints of a special type of environment or of an approach to

environmental conservation and contemplation These saints sing the song of the earth including its swamps marshes bogs fens national parks mountains forests oceans seas airs rivers reefs trees cities peoples places plants animals and so on They provide nurture for living a life of hope and symbiotic livelihood living sacrally with the earth New Lives of the Saints crosses the great divide between fiction and non fiction and mixes the genres of story and essay It is a ground breaking work of environmental counter theology for the symbiocene the hoped for age superseding the Anthropocene Challenging Journey-A True Story Peter Fee, 2006-12-21 ON THE ROAD TO RECOVERY This is the true story of Canadian stroke survivor Peter Fee a mature professional businessman whose life was drastically impacted when he suffered a stroke in his 50th year Peter has since been undergoing the process of rehabilitation at a few Toronto area hospitals including programs of traditional physiotherapy Having been discharged from outpatient rehab programs Peter had reached a plateau in his recovery He then began and continues his guest for alternate and further possibilities of rehab and recovery After being home for nearly two years since his initial admission to hospital Peter began researching numerous other avenues techniques and equipment for self therapy and recovery which include acupuncture TCM Traditional Chinese Medicine Taoist Tai Chi and other miscellaneous traditional aids He continues with these options to this day This is the story of his life including his youth maturing and growth professional career and near death as well as his physical recovery progress and experiences to date Peter's story is not complete as of the printing of this book because he is continuing his recovery efforts For this reason Peter has already started writing his second book He continues to make daily progress He is determined
