Herbst,2012-12-06 This book is based on a PhD dissertation which was accepted by the faculty of Law and Economics at the University of Bern Switzerland The ideas presented were partially developed in a research project founded by the Swiss National Science Foundation in 1993 and 1994 This research project was concerned with evaluating the application of database triggers and active databases for the implementation of business rules We recognized among other things the lack of a methodology for modeling such business rules on the conceptual level Therefore this became the focus of the follow up research which resulted in this book All this work would not have been possible without the help of several people First of all I would like to give special thanks to my thesis supervisor Prof Dr Gerhard Knolmayer He not only initiated the research project and found an industry partner but also provided very valuable ideas and critically reviewed and discussed the resulting publications Furthermore I would like to express my thanks to the second thesis supervisor Prof Dr Sham Navathe from Georgia Institute of Technology who influenced my work with results from a former research project and who agreed to evaluate the resulting PhD Dissertation **Intelligent Data analysis and its Applications, Volume II** Jeng-Shyang

Postmodern Management Theory Marta B. Calás,Linda Smircich,2019-01-15 First published in 1997 this volume asks when was The Postmodern in the History of Management Thought Marta B Cal s and Linda Smircich have chosen this subtitle as entry point to the collection for several

reasons The first and most evident is that it prompts us to reflect on the inclusion of a volume on postmodern organization studies within a series of books on the history of management thought What does such inclusion signal Are we saying that we are past the postmodern in organization studies That we have transcended modernity and beyond postmodernity Similar to other social sciences organization and management studies in the Anglo American and European academy became impressed by the styles of postmodernism and their epistemological companions poststructuralisms during the 1980s For this collection we have selected twenty two journal articles published between 1985 and 1996 that we consider emblematic of postmodern endeavours in management thought as they further our understanding of how truth of any paradigmatic persuasion is fashioned through particular discourses and other signifying practices Taken together these articles address the following questions What has the field accomplished through attempts at being postmodern With what consequences And where does the field stand now if it is still already going after the postmodern In our view the postmodern cannot transcend modern management thought it is rather part of it Nevertheless the mere appearance of efforts towards making the field postmodern makes it important to account for them in the history of the field Such is the narrative that we are trying to portray in this volume
