GENERAL INFORMATION

Your air compressor unit is suitable for operating air tools, caulking guns, grease guns, sandblasters, etc. Depending on your application, the following accessories may be required:

- An air pressure regulator to adjust the air pressure entering the tool or accessory.
- An air line filter for removal of moisture and oil vapor in compressed air.
- An in-line lubricator to protect the life of air tools.
- Separate air transformers, which combine the functions of air regulation and/or moisture and dirt removal.

Contact your nearest authorized dealer or call 1-800-AIR-SERV for more information on air tools and accessories for your application.

PREPARATION FOR USE

TRANSPORTING THE UNIT

- ⚠ **CAUTION** The wheels and handle do not provide adequate clearance, stability or support for pulling the unit up and down stairs or steps. The unit must be lifted or pushed up a ramp. Do not use the handle to lift the unit.

SELECTING A LOCATION

GENERAL. Select a clean, dry, well-lighted area with plenty of space for proper cooling air flow and accessibility. Locate the unit on a solid level surface at least 12 inches (30 cm) from walls. Ensure unit is as level as possible.

TEMPERATURE. Ideal operating temperatures are between 32°F and 104°F (0°C and 40°C). In lower temperatures, you must protect safety/relief valves and drain valves from freezing.

- ⚠ **CAUTION** Never operate in temperatures below 20°F (-6.7°C) or above 125°F (51.7°C).

HUMID AREAS. In frequently humid areas, moisture may form in the base pump and produce sludge in the lubricant, causing running parts to wear out prematurely. Excessive moisture is especially likely to occur if the unit is located in an unheated area that is subject to large temperature changes. Two signs of excessive humidity are external condensation on the base pump when it cools down and a "milky" appearance in petroleum compressor lubricant. You may be able to prevent moisture from forming in the base pump by increasing ventilation or operating for longer intervals.

NOISE CONSIDERATIONS. Consult local officials for information regarding acceptable noise levels in your area. To reduce excessive noise, use vibration mounts or intake silencers, relocate the unit or construct total enclosures or baffle walls. Contact your dealer for assistance.
