Inleiding In De Marxistiese Economie:

On the Economic Identification of Social Classes Guglielmo Carchedi, 2023-02-15 First published in 1977 On the Economic Identification of Social Classes centres around the economic identification the definition in terms of production relations of social classes focussing on the developed capitalist countries The basic stages of capitalist development are considered with special emphasis on monopoly capitalism The book includes a detailed analysis of the functional element of the capitalist production relations the identification in terms of production and distribution relations of the new middle class under monopoly capitalism and the analysis of the process of proletarianism of this class New theoretical concepts of position devaluation of labour power through dequalification of positions and of capitalist and non capitalist state activities are developed to further the discussions which although fresh in approach are immersed in the complex texture of Marxist thought This book will be of interest to students of economics and sociology *Multidisciplinary Economics* Piet Keizer, 2015-04-23 The book argues that mainstream economists who base their analyses only on the economic motivation of people fail to explain and understand real life economic phenomena The economic crisis which began in 2008 illustrates the relevance of psychic and social motivations especially when combined with each other This book discusses orthodox and heterodox economics and offers the reader ample material on philosophy of science psychology and sociology A multidisciplinary economic perspective is constructed in which economics psychology and sociology are integrated and this multidisciplinary approach offers an understanding of real life problems Moreover it offers researchers a rich source for further analysis **Inleiding in de marxistiese ekonomie** Ernest Mandel, Frank Wormer, Hugues C.
