Management Systems provides a model for implementing an effective healthcare technology management HTM system in

hospitals and healthcare provider settings as well as promoting a new analysis of hospital organization for decision making regarding technology. Despite healthcare complexity and challenges, current models of management and organization of technology in hospitals still have evolved over those established 40-50 years ago according to totally different circumstances and technologies available now. The current health context based on new technologies demands working with an updated model of management and organization which requires a re-engineering perspective to achieve appropriate levels of clinical effectiveness, efficiency, safety, and quality. Healthcare Technology Management Systems presents best practices for implementing procedures for effective technology management focused on human resources as well as aspects related to liability and the appropriate procedures for implementation. Presents a new model for hospital organization for Clinical Engineers and administrators to implement Healthcare Technology Management (HTM). Understand how to implement Healthcare Technology Management (HTM) and Health Technology Assessment (HTA) within all types of organizations including Human Resource impact, Technology Policy and Regulations, Health Technology Planning (HTP) and Acquisition as well as Asset and Risk Management. Transfer of knowledge from applied research in CE, HTM, HTP and HTA from award-winning authors who are active in international health organizations such as the World Health Organization (WHO), Pan American Health Organization (PAHO), American College of Clinical Engineering (ACCE) and International Federation for Medical and Biological Engineering (IFMBE).

ICT for Health Science Research Amnon Shabo (Shvo), Inge Cort Madsen, Hans-Ulrich Prokosch, Kristiina Häyrynen, Klaus-Hendrik Wolf, Fernando Martin-Sanchez, Matthias Löbe, 2019-04-15. Information and Communications Technology (ICT) is used in healthcare and health science research in application domains such as clinical trials and the development of drug and medical devices as well as in translational medicine with the aim of improving prevention, diagnosis and interventions in health and care. This book presents accepted papers from the 2019 European Federation of Medical Informatics conference (EFMI) STC 2019 held in Hanover, Germany from 7-10 April 2019. More than 90 submissions were received from which, after review, the Scientific Program Committee (SPC) accepted 50 full papers to be included in this volume of proceedings. In addition, 16 poster presentations were accepted. This year, ICT for Health Science Research was selected as the focus topic and the conference also honors Prof. Peter Leo Reichertz (1930-1987), one of the founding fathers of ICT in healthcare and an originator of the term Medical Informatics. The conference focuses on recent research data, privacy, interoperability, data-driven decision support, mobile data capture and ICT for clinical trials. The book will be of interest to all healthcare researchers and practitioners whose work involves the use of ICT.

Pallikarakis, Panagiotis D. Bamidis, 2010-05-28 Over the past three decades the exploding number of new technologies and applications introduced in medical practice often powered by advances in biosignal processing and biomedical imaging created an amazing account of new possibilities for diagnosis and therapy but also raised major questions of appropriateness and safety The accelerated development in this field alongside with the promotion of electronic health care solutions is often on the basis of an uncontrolled diffusion and use of medical technology The emergence and use of medical devices is multiplied rapidly and today there exist more than one million different products available on the world market Despite the fact that the rising cost of health care partly resulting from the new emerging technological applications forms the most serious and urgent problem for many governments today another important concern is that of patient safety and user protection issues that should never be compromised and expelled from the Biomedical Engineering research practice agenda
