The Digital Age on the Couch

Alessandra Lemma, 2017-04-21 The Digital Age is on the couch Working today it is essential that clinicians understand the world we live in The transition from an industrial economy to an information economy impacts not just the external structure of society and commerce but also the internal psychic economies of our brains and inevitably how clinicians conceptualise the analytic setting in which they practice as therapists and analysts The Digital Age on the Couch seeks to understand more about how new technologies interact with the prerogatives of an individual's internal world how they may alter psychic structure itself in fundamental ways and the implications this may have for the individual's functioning and for the operation of society This book attempts from the perspective of a working clinician to make some sense of this The impact of mediation via technology and the consequent disintermediation of the body represent central themes throughout as they impact on the experience of embodiment on the work of desire and on the way new media influences psychoanalytic practice New media offer opportunities for increasing accessibility to mental health care including psychoanalytic interventions However this requires a sophisticated understanding of how to best create and safeguard the analytic setting Alessandra Lemma here guides the clinician through an exploration of the limitations and risks of mediated psychotherapy illustrated with clinical examples throughout The Digital Age on the Couch offers an accessibly written guide to combining existing psychoanalytic theory and practice with the challenges presented by digital media It will appeal to psychoanalysts psychoanalytic psychotherapists and counsellors

Technologies of Consumer Labor Michael Palm, 2016-11-03 This book documents and examines the history of technology used by consumers to serve oneself The telephone's development as a self service technology functions as the narrative spine beginning with the advent of rotary dialing eliminating most operator services and transforming every local connection into an instance of self service Today nearly a century later consumers manipulate 0 9 keypads on a plethora of digital machines Throughout the book Palm employs a combination of historical political economic and cultural analysis to describe how the telephone keypad was absorbed into business models across media retail and financial industries as the interface on everyday machines including the ATM cell phone and debit card reader He argues that the naturalization of self service telephony shaped consumers attitudes and expectations about digital technology

Constrained Elitism and Contemporary Democratic Theory Timothy Kersey, 2016-01-08 Today examples of the public's engagement with political issues through commercial and communicative mechanisms have become increasingly common In February 2012 the Susan G Komen Foundation reversed a decision to cease funding of cancer screening programs through Planned Parenthood amidst massive public disapproval The same year restaurant chain Chic fil A became embroiled in a massive public debate over statements its President made regarding same sex marriage What exactly is going on in such public engagement and how does this relate to existing ideas regarding the public sphere and political participation Is the public becoming increasingly vocal in its complaints Or are new relationships between the public and

economic and political leaders emerging Timothy Kersey's book asserts that the widespread utilization of internet communications technologies especially social media applications has brought forth a variety of new communicative behaviors and relationships within liberal polities Through quick and seemingly chaotic streams of networked communication the actions of these elites are subject to increasingly intense scrutiny and short term pressure to ameliorate or at least address the concerns of segments of the population By examining these new patterns of behavior among both elites and the general public Kersey unearths the implications of these patterns for contemporary democratic theory and argues that contemporary conceptualizations of the public need to be modified to more accurately reflect practices of online communication and participation By engaging with this topical issue Kersey is able to closely examine the self organization of both elite and non elite segments of the population within the realm of networked communication and the relations and interactions between these segments His book combines perspectives from political theory and communication studies and so will be widely relevant across both disciplines

In the Meantime Sarah Sharma, 2014-02-07 Based on ethnographic research with taxi drivers frequent flyer business travelers devotees of the slow food and slow living movements and others Sarah Sharma argues that people's relations to labor shape their experiences of time

The SAGE Handbook of Intellectual Property Matthew David, Debora Halbert, 2014-11-18 This Handbook brings together scholars from around the world in addressing the global significance of controversies over and alternatives to intellectual property IP today It brings together over fifty of the leading authors in this field across the spectrum of academic disciplines from law economics geography sociology politics and anthropology This volume addresses the full spectrum of IP issues including copyright patent trademarks and trade secrets as well as parallel rights and novel applications In addition to addressing the role of IP in an increasingly information based and globalized economy and culture it also challenges the utility and viability of IP today and addresses a range of alternative futures

Language as Symbolic Power Claire Kramsch, 2020-10-29 Language is not simply a tool for communication symbolic power struggles underlie any speech act discourse move or verbal interaction be it in face to face conversations online tweets or political debates This book provides a clear and accessible introduction to the topic of language and power from an applied linguistics perspective It is clearly split into three sections the power of symbolic representation the power of symbolic action and the power to create symbolic reality It draws upon a wide range of existing work by philosophers sociolinguists sociologists and applied linguists and includes current real world examples to provide a fresh insight into a topic that is of particular significance and interest in the current political climate and in our increasingly digital age The book shows the workings of language as symbolic power in educational social cultural and political settings and discusses ways to respond to and even resist symbolic violence

European Media in Crisis Josef

Trappel, Jeanette Steemers, Barbara Thomass, 2015-06-12 When the financial markets collapsed in 2008 the media industry was affected by a major slump in advertising revenues and a formerly highly successful business model fell into a state of decay This economic crisis has threatened core social values of contemporary democracies such as freedom diversity and equality Taking a normative and policy perspective this book discusses threats and opportunities for the media industry in Europe What are the implications of the crisis for professional journalism the media industry and the process of political communication Can non state and non market actors profit from the crisis And what are media policy answers at the national and European level *Digitize this Book!* Gary Hall, 2008 In the sciences the merits and ramifications of open access the electronic publishing model that gives readers free irrevocable worldwide and perpetual access to research have been vigorously debated Open access is now increasingly proposed as a valid means of both disseminating knowledge and career advancement In *Digitize This Book* Gary Hall presents a timely and ambitious polemic on the potential that open access publishing has to transform both a papercentric humanities scholarship and the institution of the university itself

Bioethics in the Age of New Media Joanna Zylińska, 2009-03-20 An examination of ethical challenges that technology presents to the allegedly sacrosanct idea of the human and a proposal for a new ethics of life rooted in the philosophy of alterity Bioethical dilemmas including those over genetic screening compulsory vaccination and abortion have been the subject of ongoing debates in the media among the public and in professional and academic communities But the paramount bioethical issue in an age of digital technology and new media Joanna Zylińska argues is the transformation of the very notion of life In this provocative book Zylińska examines many of the ethical challenges that technology poses to the allegedly sacrosanct idea of the human In doing so she goes beyond the traditional understanding of bioethics as a matter for moral philosophy and medicine to propose a new ethics of life rooted in the relationship between the human and the nonhuman both animals and machines that new technology prompts us to develop After a detailed discussion of the classical theoretical perspectives on bioethics Zylińska describes three cases of bioethics in action through which the concepts of the human animal and life are being redefined the reconfiguration of bodily identity by plastic surgery in a TV makeover show the reduction of the body to two dimensional genetic code and the use of biological material in such examples of bioart as Eduardo Kac's infamous fluorescent green bunny Zylińska addresses ethics from the interdisciplinary perspective of media and cultural studies drawing on the writings of thinkers from Agamben and Foucault to Haraway and Hayles Taking theoretical inspiration in particular from the philosophy of alterity as developed by Jacques Derrida Emmanuel Levinas and Bernard Stiegler Zylińska makes the case for a new nonsystemic nonhierarchical bioethics that encompasses the kinship of humans animals and machines **Respawn** Colin Milburn, 2018-12-14 Colin Milburn examines the relationships between video games hackers and science fiction showing how games provide models of social and political engagement critique and resistance while offering a vital space for players and hacktivists to challenge centralized power and experiment with

alternative futures **Visual Art and Education in an Era of Designer Capitalism** Jan Jagodzinski, 2010-10-11 This book offers a unique perspective of art and its education in designer capitalism It will contribute to the debate as to possibilities art and design hold for the future It also questions the broad technologization of art that is taking place **Between Page and Screen** Kiene Brillenburg Wurth, 2012 The contributors to this volume reassess literary practice at the edges of paper electronic media and film They show how the emergence of a new medium reinvigorates the book and the page as literary media rather than announcing their impending death *Designing the Domestic Posthuman* Colbey Emmerson Reid, Dennis M. Weiss, 2023-12-28 Ever since TIME magazine's 1983 Man of the Year was the PC we have been led to believe that our domestic spaces have been colonized by digital technology Too little attention has been paid to the domestic spaces and inhabitants impacted by this and critical posthumanism has been captured by a picture of humanity overly indebted to digital technologies and their largely male progenitors By applying feminist theory to posthumanism this work recovers the plethora of sophisticated human technology mediations associated with the home and practiced primarily by women the elderly infants the disabled and across cultures globally challenging dominant contemporary visions of a future humanity Authors Dennis M Weiss and Colbey Emmerson Reid look at various iterations of the posthuman and assert the need for alternative feminist readings that emphasize different standpoints from which to assess people places and products Chapters address the impact of posthumanism on design theory and look at familiar domestic objects with different attributes from those typically affiliated with technology and the future such as clothing textiles ceramics furniture and wallpaper They reveal their unhomely extra human qualities and offer a much needed perspective on domestic spaces and practices revivifying the home as a site of species transformation and pushing beyond traditional understandings of person mothering families and care giving to highlight a range of critically overlooked mediated materialisms and embodiments affiliated with domestic space By focusing on the neglected intersection of the posthuman with the home and exploring domestic posthuman design *Designing the Domestic Posthuman* offers a vision of a future humanity that retains identity integrity and considers our relationship to others to the world and things in it This book widens the lens of critical focus in posthumanism feminist philosophy and design and presents an alternative inclusive design framework for the future **Radical Democracy and the Internet** L. Dahlberg, E. Siaperá, 2007-05-22 In this systematic and mutual interrogation of radical democratic theory and Internet practice contributors examine a range of democratic theories in relation to online communication and explore how such communication may advance democracy beyond what is conceptualized and practised within present liberal capitalist political contexts *Handbook of Cultural Sociology* Laura Grindstaff, John R.
