Information, Natural Law, and the Self-assembly of Rhythmic Movement Peter Noble Kugler, Michael T. Turvey, 1987 Bernstein's Construction of Movements Mark L. Latash, 2020-10-29 Nikolai Aleksandrovich Bernstein was one of the great neuroscientists of the twentieth century and highly respected by Western scientists even though most have never read his most important book entitled *On the Construction of Movements* Bernstein's *Construction of Movements* The Original Text and Commentaries is the first English translation. It supplements the translated text with a series of commentaries by scientists who knew Bernstein personally as well as leaders in related fields including physics, motor control and biomechanics. While written in 1947, Bernstein's book is anything but obsolete, making this English translation and accompanying commentaries an invaluable text. The translated original text presents in detail Bernstein's views on the evolutionary history of biological movement and his multi-level hierarchical scheme of the construction of movements in higher animals including humans. The following commentaries address Bernstein's personality, the history of the book and current views on different aspects of neuroscience covered in Bernstein's text. Ultimately, they present a book within the book to showcase how Bernstein's heritage has developed over the past years. This classic, available for the first time to an English-speaking audience, will prove beneficial to students, instructors, and experts of neuroscience, physics, neurophysiology, motor control, motor rehabilitation, biomechanics, dynamical systems, and related fields. *Information, Natural Law, and the Self-assembly of Rhythmic Movement* Peter Noble Kugler, Michael T. Updated and revised to reflect the new developments in the field, the *Handbook of Child Psychology* Sixth Edition contains new chapters on such topics as spirituality, social understanding, and non-verbal communication. Volume 2: *Cognition, Perception, and Language*, edited by Deanna Kuhn, Columbia University, and Robert S. Siegler, Carnegie Mellon University, covers mechanisms of cognitive and perceptual development in language acquisition. It includes new chapters devoted to neural bases of cognition, motor development, grammar, and language rules, information processing, and problem-solving skills. **Oxford Textbook of Children's Sport and Exercise Medicine** Neil Armstrong, Willem Van Mechelen, 2023 The 4th edition of the *Oxford Textbook of Children's Sport and Exercise Medicine* is the definitive single-volume reference in the field, presented in four sections: Exercise Science, Exercise Medicine, Sport Science, and Sport Medicine. *Recording for the Blind & Dyslexic, ...
