Critical Perspectives on Open Development Arul Chib, Caitlin M. Bentley, Matthew L. Smith, 2021-02-16 Theoretical and empirical analyses of whether open innovations in international development instrumentally advantages poor and marginalized populations Over the last ten years open innovations the sharing of information without access restrictions or cost have emerged within international development But do these practices instrumentally advantage poor and marginalized populations This book examines whether for whom and under what circumstances the free networked public sharing of information and communication resources contributes or not towards a process of positive social transformation The contributors offer both theoretical and empirical analyses that cover a broad range of applications emphasizing the underlying aspects of open innovations that are shared across contexts and domains

The Oxford Handbook of Management Information Systems Robert D Galliers, Wendy Currie, 2011-07-28 Management Information Systems MIS play a crucial role in an organization s operations accounting decision making project management and competitive advantage The Oxford Handbook of Management Information Systems takes a critical and interdisciplinary view of the increasing complexity of these systems within organizations and the strategic managerial and ethical issues associated with the effective use of these technologies The book is organized into four parts Part I Background Part II Theoretical and Methodological Perspectives in MIS Part III Rethinking Theory in MIS Practice Part IV Rethinking MIS Practice in a Broader Context The Handbook provides expansive coverage of the discipline and a methodological and philosophical framework for discussion of key topics before exploring the issues associated with MIS in practice and considering the broader context and future agenda of research in light of such concerns as sustainability ethics and globalization Bringing together international scholars to focus on the theory and practice of MIS this handbook provides a comprehensive resource for academics and research students in the fields of MIS IS Organizational Behaviour and Management in general

Information Systems -- Creativity and Innovation in Small and Medium-Sized Enterprises Gurpreet Dhillon, Bernd Carsten Stahl, Richard Baskerville, 2009-07-10 This book contains the collection of papers presented at the conference of the International Federation for Information Processing Working Group 8 2 Information and Organizations The conference took place during June 21 24 2009 at the Universidade do Minho in Guimaraes Portugal The conference entitled CreativeSME The Role of IS in Leveraging the Intelligence and Creativity of SME s attracted high quality submissions from across the world Each paper was reviewed by at least two reviewers in a double blind review process In addition to the 19 papers presented at the conference there were five panels and four workshops

which covered a range of issues relevant to SMEs creativity and information systems We would like to show our appreciation of the efforts of our two invited keynote speakers Michael Dowling of the University of Regensburg Germany and Carlos Zorrinho Portuguese coordinator of the Lisbon Strategy and the Technological Plan The following organizations supported the conference through financial or other contributions and we would like to thank them for their engagement

Privacy and Capitalism in the Age of Social Media Sebastian Seignani, 2015-08-27 This book explores commodification processes of personal data and provides a critical framing of the ongoing debate of privacy in the Internet age using the example of social media and referring to interviews with users It advocates and expands upon two main theses First people's privacy is structurally invaded in contemporary informational capitalism Second the best response to this problem is not accomplished by invoking the privacy framework as it stands because it is itself part of the problematic nexus that it struggles against Informational capitalism poses weighty problems for making the Internet a truly social medium and aspiring to sustainable privacy simultaneously means to struggle against alienation and exploitation In the last instance this means opposing the capitalist form of association online and offline

Trump and Autobiography Nicholas K. Mohlmann, 2021-07-21 The 1970s and 1980s heralded the rise of neoliberalism in United States culture fundamentally reshaping life and work in the United States Corporate culture increasingly penetrated other aspects of American life through popular press CEO autobiographies and management books that encouraged individuals to understand their lives in corporate terms Propelled into the public eye by the publication of 1989's *The Art of the Deal* ostensibly a CEO autobiography Donald Trump has made a career out of reversing the autobiographical impulse presenting an image of his life that meets his narrative needs While many scholars have sought a political precedent for Trump's rise to power this book argues that Trump's aesthetics and life production uniquely primed him for populist political success through their reliance on the tropes of popular corporate culture Trump and Autobiography contextualizes Trump's autobiographical works as an extension of the popular corporate culture of the 1980s in order to examine how Trump constructs an image of himself that is indebted to the forms genres and mechanisms of corporate speech and narrative Ultimately this book suggests that Trump's appeal and resilience rest in his ability to signify as though he is a corporation revealing the degree to which corporate culture has reshaped American society's interpretive processes

Critical Theory for Library and Information Science Gloria J. Leckie, Lisa M. Given, John E. Buschman, 2010-07-26 This text provides an overview of major critical theorists from across disciplines including the humanities social sciences and education that discusses the importance of these critical perspectives for the advancement of LIS research and scholarship The practical application of library and information science is based upon 75 years of critical theory and thought Therefore it is essential for students and faculty in LIS to be familiar with the work of a wide range of critical theorists The aim of *Critical Theory for Library and Information Science Exploring the Social from Across the Disciplines* is to provide a comprehensive introduction to the critical theorists important to the LIS audience and

to give insights into how such theory can be incorporated into actual LIS research and practice This book consists of chapters on individual critical theorists ranging from Aglietta to Habermas to Spivak written by an international group of library and information science scholars Each chapter provides an overview of the theoretical stance and contributions of the theorist as well as relevant critical commentary This book will be particularly valuable as a reference text of core readings for those pursuing doctoral or masters level degrees in LIS

Big Crisis Data Carlos Castillo, 2016-07-04 Social media is an invaluable source of time critical information during a crisis However emergency response and humanitarian relief organizations that would like to use this information struggle with an avalanche of social media messages that exceeds the human capacity to process Emergency managers decision makers and affected communities can make sense of social media through a combination of machine computation and human compassion expressed by thousands of digital volunteers who publish process and summarize potentially life saving information This book brings together computational methods from many disciplines natural language processing semantic technologies data mining machine learning network analysis human computer interaction and information visualization focusing on methods that are commonly used for processing social media messages under time critical constraints and

offering more than 500 references to in depth information Social Inclusion: Societal and Organizational Implications for Information Systems Eileen Trauth, Debra Howcroft, Tom Butler, Brian Fitzgerald, Janice DeGross, 2006-09-13 Changes in society resulting from the pervasiveness of information technology have produced positive and negative intended and unintended consequences Key among them is the exclusion of individuals who lack access to technological resources from various societal processes and services The theme of this book social inclusion explores the many dimensions of this exclusion This issue has been the focus of much debate within the social sciences yet has largely been underresearched in the Information Systems field despite our concerns with the social and organizational aspects of technology To the extent that contemporary debates have identified access to information as a key component of poverty digital exclusion is seen as the problem Thus ICTs are portrayed as either exacerbating exclusion or are presented as the solution for greater inclusion This conference will provide us with the opportunity to build upon our strong tradition of studying technology design and use in organizations and expand our field of enquiry to consider the processes that engender social exclusion and the issues that derive from it This theme invites consideration of social and organizational constraints that result in the underrepresentation of certain groups and by implication certain issues Likewise it invites consideration of emerging technologies that have the potential to alter social political and economic relations Much is being written about the ubiquitous nature of ICTs to change society for example open source software has recently emerged as a concept with implications far beyond the technology domain This suggests that the role of ICTs in addressing social exclusion is far more complex than often thought For this reason it is timely to expand our focus and progress the study of IS beyond the organizational level of analysis so that we may consider wider concerns affecting all citizens This book contains the proceedings of the Working Conference on the societal and organizational implications for information systems of social inclusion This conference sponsored by the International Federation for Information Processing Working Group 8.2 was held in Limerick Ireland July 12-15 2006 *Artificial Intelligence for a Better Future* Bernd Carsten Stahl, 2021-03-17 This open access book proposes a novel approach to Artificial Intelligence AI ethics AI offers many advantages better and faster medical diagnoses improved business processes and efficiency and the automation of boring work But undesirable and ethically problematic consequences are possible too biases and discrimination breaches of privacy and security and societal distortions such as unemployment economic exploitation and weakened democratic processes There is even a prospect ultimately of super intelligent machines replacing humans The key question then is how can we benefit from AI while addressing its ethical problems This book presents an innovative answer to the question by presenting a different perspective on AI and its ethical consequences Instead of looking at individual AI techniques applications or ethical issues we can understand AI as a system of ecosystems consisting of numerous interdependent technologies applications and stakeholders Developing this idea the book explores how AI ecosystems can be shaped to foster human flourishing Drawing on rich empirical insights and detailed conceptual analysis it

suggests practical measures to ensure that AI is used to make the world a better place *Researching the Future in Information Systems* Mike Chiasson, Ola Henfridsson, Helena Karsten, Janice I. DeGross, 2011-06-15 This book constitutes the refereed proceedings of the IFIP WG 8.2 Working Conference Researching the Future Future IS 2011 held in Turku Finland in June 2011 The 17 revised full papers presented together with 4 panels and workshops were carefully reviewed and selected from numerous submissions The papers are organized into 6 topical sections how the future and the past are connected and inter related critical view of the future technological futures the future of information technology and work related practices in health care the future of industrial and institutional practices and outcomes through information technology and the future of critical realism in IS research The Capability Approach, Technology and Design Ilse Oosterlaken, Jeroen van den Hoven, 2012-03-30 The capability approach of Martha Nussbaum and Amartya Sen places human capabilities at the centre stage of discussions about justice equality development and the quality of life It rejects too much emphasis on mere preference satisfaction or resource provision and highlights the importance of human agency and freedom This approach has already significantly influenced different fields of application such as economics and development studies Only recently have scholars started to explore its relevance for and application to the area of technology and design which can be crucial factors in the expansion of human capabilities How does technology influence human capabilities What difference could a capability approach make to policies and practices of applying ICT in development processes in the South How can we criticize and improve the design of technology from the perspective of the capability approach The authors of this volume explore the implications of the capability approach for technology design and together create the first volume on this emerging topic **Social and Human Elements of Information Security: Emerging Trends and Countermeasures** Gupta, Manish, Sharman, Raj, 2008-09-30 Provides research on the social and human aspects of information security Presents the latest trends issues and findings in the field **Professionalism in the Information and Communication Technology Industry** John Weckert, Richard Lucas, 2013-10-15 Professionalism is arguably more important in some occupations than in others It is vital in some because of the life and death decisions that must be made for example in medicine In others the rapidly changing nature of the occupation makes efficient regulation difficult and so the professional behaviour of the practitioners is central to the good functioning of that occupation The core idea behind this book is that Information and Communication Technology ICT is changing so quickly that professional behaviour of its practitioners is vital because regulation will always lag behind Handbook of Research on Digital Information Technologies: Innovations, Methods, and Ethical Issues Hansson, Thomas, 2008-06-30 This book provides a collection of successful designs defined as communicative relation building solutions for individuals and collectives of interlocutors It includes a longitudinal perspective of past mistakes current trends and future opportunities and is a must have for beginners in the field as well as qualified professionals exploring the full potential of human interactions Provided by publisher **Der**

Karikaturenstreit und die Pressefreiheit. Wert- und Normenkonflikte in der globalen Medienkultur Bernhard Debatin, 2007 Die von der danischen Zeitung Jyllands Posten im September 2005 veröffentlichten Mohammed Karikaturen waren für manche ein Test der Grenzen der Pressefreiheit für andere nur eine bosartige und geschmacklose Provokation Für wiederum andere boten sie einen willkommenen Anlass zum gewalttätigen Protest Der Karikaturenstreit wirft eine Reihe von Fragen auf Geht es um die Verteidigung der Pressefreiheit oder um bloße Islamophobie Steht hier westliche Toleranz gegen östliche Borniertheit oder geht es um gegenseitigen Respekt und Zurückhaltung Wurde der ganze Konflikt durch die Medien künstlich erzeugt und angeheizt Müssen wir in der globalisierten Medienkultur eine neue Medienethik der interkulturellen Anerkennung entwickeln Und wie können wir erreichen dass dieser Respekt wechselseitig ist und nicht bloss zur liberalen Toleranz der Intoleranz wird To some the infamous Mohammed Cartoons that were published in September 2005 by the Danish newspaper Jyllands Posten tested the limits of the freedom of the press Others regarded them as a malicious and tasteless provocation And for yet others they were a welcome excuse for violent protests The cartoon debate raises a number of questions What is paramount here defense of the freedom of the press or mere Islamophobia Is Western tolerance pitted against Oriental narrow mindedness or is this rather an issue of mutual respect and restraint Was the whole conflict artificially created and inflamed by the media Do we need to develop a new media ethics of intercultural recognition in the global media culture And how can we ensure that this respect is mutual and not just laissezfaire tolerance of intolerance

Global and Organizational Discourse about Information Technology Eleanor H. Wynn, Edgar A. Whitley, Michael D. Myers, Janice I. DeGross, 2013-06-29 Over the past 20 years the field of information systems has grown dramatically in theoretical diversity and global reach This growth is reflected in the language that policy makers and organizational stakeholders use when they talk about their IT plans As information technology penetrates further into organizational and global life it becomes ever more important to articulate assumptions embedded in the discourse This will help to clarify the complex and yet conceptually improvised or pasted up worldview that becomes embodied in systems The assumptions point to particular domains of discourse The discourse sets up conventions and boundaries It thus shapes what can or cannot legitimately be talked about researched addressed or solved within the scope of IT A number of practical and theoretical topics are discussed in detail including Globalization development and space Mobilization of power ERP systems IS planning and projects Critical research and the study of discourse Public institutions Analytical frameworks This book contains the selected proceedings of the Working Conference on Global and Organizational Discourse About Information Technology sponsored by the International Federation for Information Processing IFIP and held in Barcelona Spain in December 2002
