Evangelicals and the Arts in Fiction John Weaver, 2013-04-06 This book is an exploration of how the relationship of evangelicals to the arts has been portrayed in fiction for the last century The author argues that evangelicals are consistently seen as enemies of the arts by non evangelical writers The artist typically represented by a literal artist occasionally by a scientist or reluctant messiah typically has to fight for liberation from such cliched character types as the failed evangelical artist the rube or the hypocritical pastor Rather than resist the cliché of anti art evangelicalism the book contends that evangelicals should embrace it this stereotype is only hurtful so long as one assumes that the arts represent a positive force in human society This work built off the scholarship of John Carey does not make that assumption Surveying the current pro artistic views of most evangelicals the author advances the argument that evangelicals need to return to their anti art roots By doing so they would align themselves with the most radical artistic elements of modernism rather than with the classicists that the movement currently seems to prefer and provide space for themselves to critique how secular artistic stereotypes of evangelicals have economically and artistically marginalized the evangelicals community **Raising Cain** Wayne Harvey, 2013 Old as the hills see eye to eye raising Cain this collection of insights and anecdotes about how ancient scripture still shapes the things we say today is a great conversation piece and a fun testament to the Bible's lasting influence

The Role of the Literary Canon in the Teaching of Literature Robert Aston,2020-05-12 This book investigates the role of the idea of the literary canon in the teaching of literature especially in colleges and secondary schools in the United States Before the term canon was widely used in literary studies which occurred in the second half of 20th century when the canon was first seriously viewed as politically and culturally problematic the idea that some literary texts were more worthy of being studied than others existed since the beginning of the discipline of the teaching of literature in the 1800s The concept of the canon however extends as far back as to Ancient Greece and its meaning has evolved over time Thus this book charts the changing meaning of the idea of the literary canon examining its influence specifically in the teaching of literature from the beginning of the field to the 21st century To explain how the literary canon and the teaching of literature have changed over time and continue to change this book constructs a theory of canon formation based on the ideas of Michel Foucault and the assemblage theory of Manuel DeLanda illustrating that the literary canon while frequently contested is integral to the teaching of literature yet changes as the teaching of literature changes
