The Hydrogen Age Geoffrey B. Holland, James J. Provenzano, 2007 Hydrogen linked with clean renewable sources of energy provides the prescription for the ills of an ailing planet Geoffrey B Holland and James J Provencano s hallmark book The hydrogen age details just how this remarkable energy carrier has been vital to the workings of the universe since the beginning of time and why it is now ready to play a central part in healing our Earth our atmosphere and the world s economies as a clean energy commodity book jacket

Preston Tucker and Others Arvid Linde, 2011-05-10 Can you imagine a world where people drive beautiful and unusual cars created by designers prodigiously endowed with talent and imagination Names like Preston Tucker Carl Borgward and John DeLorean are hardly known today Nevertheless today s cars would be a lot different without their contributions to automotive engineering Although the car is a technological and rational affair it s the dreamers and eccentrics like these who have made the biggest contribution to the development of the industry those who have had the ability to think beyond their time and conventions Money doesn t drive progress in the car business it is a passion for speed and an obsession with mechanisms Yet for many a dreamer this passion has ended in fiasco Misunderstood and pushed aside by their contemporaries they have been forced to watch their dreams trampled underfoot This book takes a look at the history of the car from a different angle avoiding the mainstream moguls and telling a story about a man and his dream and the like minded people that came before and after him Lavishly illustrated and intensively researched it documents the making of some of the strangest and greatest cars of the past century The main section is devoted to the unsung heroes of motoring and the rest of the book shines a light on the many ingenious inventions we now take for granted Let s show some respect to the dreamers Our world wouldn t be so exciting without them

Towards Sustainable Road Transport Ronald M. Dell, Patrick T. Moseley, David A. J. Rand, 2014-06-11 Increasing pressure on global reserves of petroleum at a time of growing demand for personal transport in developing countries together with concerns over atmospheric pollution and carbon dioxide emissions are leading to a requirement for more sustainable forms of road transport Major improvements in the efficiency of all types of road vehicles are called for along with the use of fuels derived from alternative sources or entirely new fuels Towards Sustainable Road Transport first describes the evolution of vehicle designs and propulsion technologies over the past two centuries before looking forward to possible new forms of energy to substitute for petroleum The book also discusses the political and socio economic drivers for change investigates barriers to their broad implementation and outlines the state of the art of candidate power sources advanced vehicle design and associated infrastructure The comprehensive technical information supplied by an expert author team ensures that Towards Sustainable Road Transport will provide readers with a clear understanding of the ongoing progress in this field and the challenges still to be faced Drivers of technological change in road transport and the infrastructure requirements Discussion of alternative fuels for internal combustion engines and fuel conversion technologies Detailed exploration of current and

emerging options for vehicle propulsion with emphasis on hybrid battery electric traction hydrogen and fuel cells
Comparative analysis of vehicle design requirements primary power source efficiency and energy storage systems
