Field Guide to Succulents of Southern Africa Gideon Smith, 2017-08-11 Southern Africa is the natural home of the richest and most diverse succulent flora in the world. These plants come in all shapes and sizes, from trees such as the baobab at more than 20 m tall to miniature soil huggers just a few millimetres high which mimic their pebble desert surroundings. This user-friendly, richly illustrated field guide features more than 700 southern African succulents, focusing on the most interesting and commonly encountered species. An introduction to families and their key features will help readers identify the relevant plant group, while concise accounts describing the plants' diagnostic features, along with distribution maps, will enable quick ID of species. More than just an ID guide for plant lovers, this book will inspire gardeners who are turning to indigenous low-maintenance and waterwise plants for cultivation.

[The Living Deserts of Southern Africa](#) Barry Lovegrove, 2021-09-01 For generations the deserts of southern Africa have intrigued scientists and travellers alike. Seemingly barren wastes, they in fact teem with life, from ants to elephants, stone plants to the curious welwitschia, dainty dik-diks to towering gemsbok and cart-wheeling spiders, to fog-basking beetles. How do they cope with scarce resources, unpredictable rainfall, and extreme temperatures? How do they protect themselves against predators? And what is the impact of climate change on these life forms and their habitats? Drawing on an earlier edition published in 1993, biologist Barry Lovegrove answers these questions and unravels many of the mysteries associated with life in the desert. He describes the four arid biomes of South Africa: Namibia and Botswana Desert, Arid Savanna, Succulent Karoo, and Nama Karoo, and explains how and why such a great diversity of plants, insects, mammals, reptiles, and birds successfully exist in these

regions The text is supported by the most recent research spectacular photographs and explanatory diagrams and maps The Living Deserts of Southern Africa is a compelling in depth read that is accessible to both the serious student and academic as well as the interested nature lover Sales points A fully revised and updated edition of a classic text 1993 on southern Africa s desert zones highly readable entertaining and informative that draws on the latest scientific research covers the desert regions of South Africa Namibia and Botswana stunning full colour photographs support the text Waterwise Gardening in South Africa and Namibia Ernst van Jaarsveld,2013-10-29 Plants that are indigenous to an area do not need additional watering they are automatically adapted to the prevailing climate and weather conditions and are able to thrive under all but the most exceptional of circumstances Gardening in harmony with nature means no longer having to provide the soil conditions and amount of water that non indigenous species require Waterwise Gardening in South Africa and Namibia is aimed at anyone who wants to create a new garden or convert an existing one to waterwise principles The first part of the book focuses on general horticultural practises such as creating the right type of garden for your climate and the best time to plant or prune Part two details various garden types based on South Africa s vegetation regions Fynbos Strandveld fynbos and Succulent Karoo for the winter rainfall areas Highveld Bushveld Thicket and Karoo for the summer rainfall regions The forests and coastal belt of the Indian Ocean seaboard are covered as are the Namib and adjacent desert areas and indigenous indoor plants For each region representative lists of plant species are presented in categories such as trees shrubs perennials architectural plants succulents etc with notes on plant form height and growth rate flower colour months in flower and whether they prefer sun or shade **The Cactus and Succulent Journal of Great Britain** ,1954 *Cactus and Succulent Journal of Great Britain* ,1953 **The Karoo** W.
