Gruber Public Finance Solutions Manual:

Public Finance and Public Policy Jonathan Gruber, 2011 When first published Gruber's *Public Finance and Public Policy* brought a refreshingly contemporary approach. It was the first text written from the ground up to reflect current realities of public finance enhancing its survey of traditional topics with an emphasis on empirical work and coverage of transfer programs and social insurance. The new edition fully updated with the most recent data and research possible includes new coverage of the Medicare drug benefit changes in the tax code Hurricane Katrina and the ongoing debate over privatization.

Modeling with the National Assessment of Adult Literacy David Kaplan, 2000 This paper offers recommendations to the National Center for Education Statistics (NCES) on the development of the background questionnaire for the National Assessment of Adult Literacy (NAAL). The recommendations are from the viewpoint of a researcher interested in applying sophisticated statistical models to address important issues in adult literacy. The paper focuses on five issues, each of which is the subject of a section of the paper: sampling, selection bias, measurement, policy modeling, and gauging cohort effects. Each section considers the scope of the issue and then makes recommendations to NCES. These recommendations include providing all appropriate sampling weights in NAAL data; examining contextual effects on the distribution of literacy ability in the population; considering relevant auxiliary variables that would constitute the selection equation; considering the hypothesized number of factors and including at least four variables measuring each factor in the questionnaire; obtaining retrospective data on general and job-specific literacy-related activities; and exploring the possibility of linking NAAL with existing longitudinal surveys. Contains 21 references.
