### **Participation, Marginalization and Welfare Services**

Aila-Leena Matthies, Lars Uggerhøj, 2016-05-13 Current debates around participation and marginalization dominate the agenda of many European political forums There is an increasing concern about the stability of social cohesion and a growing number of particular groups of people who are regarded as being at risk of being socially excluded or marginalized This volume goes beyond the surface of public discussions to look at the central role played by welfare services in European societies in either strengthening or hindering participatory citizenship and democracy In current discussions welfare services understood in a broad sense are centrally positioned there are high expectations that welfare services can hinder marginalization and enable participation Yet marginalization is in most cases rooted in the deeper structures of society with economy participation and involvement dependent on political or highly personal factors which are beyond the scope of welfare services This groundbreaking volume posits that participation and marginalization are twin concepts expressing opposing sides of one and the same processes faced by individuals and communities It will be essential reading for social workers sociologists and policy makers throughout Europe
