terrific Leidner's fascinating report from the frontlines of two major American corporations uncovers the methods and consequences of regulating workers' language, looks at attitudes, ideas, and demeanor. Her study reveals the complex and often unexpected results that come with the routinization of service work. Some McDonald's workers resent the constraints of prescribed uniforms and rigid scripts, while others appreciate how routines simplify their jobs and give them psychological protection against unpleasant customers. Combined Insurance goes further than McDonald's in attempting to standardize the workers very selves, instilling in them adroit maneuvers to overcome customer resistance. The routinization of service work has both poignant and preposterous consequences. It tends to undermine shared understandings about individuality and social obligations, sharpening the tension between the belief in personal autonomy and the domination of a powerful corporate culture. Richly anecdotal and accessibly written, Leidner's book charts new territory in the sociology of work. With service sector work becoming increasingly important in American business, her timely study is particularly welcome.

**Re-Thinking the Future of Work** Colin C. Williams, 2007-02-28 How will work be organised in the future? United States. National Mediation Board, 1994 **Working in America** Amy S. Wharton, 2015-11-17 The Great Recession brought rising inequality and changing family economies. New technologies continued to move jobs overseas, including those held by middle class information workers. The first new edition to capture these historic changes, this book is the leading text in the sociology of work and related research fields. Wharton's readings retain the classics but offer a new spectrum of articles accessible to undergraduate students that focus on the changes that will most affect their lives. New to the fourth edition. **Tax Court Reported Decisions** United States. Tax Court, 1993 [Working for McDonald's in Europe](#)

Tony Royle, 2004-08-02 The McDonald's Corporation is not only the largest system-wide sales service in the world, it is a phenomenon in its own right and is now recognized as the most famous brand in the world. By providing a detailed analysis of the extent to which the McDonald's Corporation adapts or imposes its labour relations policies in Europe, this volume represents a real-life case study revealing the interaction between a global multi-national enterprise and the regulatory systems of a number of different European countries. Key features include an overview of the McDonald's Corporation's development and structure; an analysis of its corporate culture and the issues of franchising; an examination of key union strategies including systems of co-determination, consultation and collective bargaining; a chapter dealing specifically with European legislation, in particular the McDonald's European Works Council. The author systematically analyzes the conflict between the McDonald's Corporation and the industrial relations systems of the European countries within which it operates and exposes this conflict as an unequal struggle between economic liberalism and collectivism.
