Gridlock Why Global Cooperation Is Failing When We Need It Most:

Gridlock Thomas Hale, David Held, Kevin Young, 2013-07-11 The issues that increasingly dominate the 21st century cannot be solved by any single country acting alone no matter how powerful To manage the global economy prevent runaway environmental destruction reign in nuclear proliferation or confront other global challenges we must cooperate But at the same time our tools for global policymaking chiefly state to state negotiations over treaties and international institutions have broken down The result is gridlock which manifests across areas via a number of common mechanisms The rise of new powers representing a more diverse array of interests makes agreement more difficult The problems themselves have also grown harder as global policy issues penetrate ever more deeply into core domestic concerns Existing institutions created for a different world also lock in pathological decision making procedures and render the field ever more complex All of these processes in part a function of previous successful efforts at cooperation have led global cooperation to fail us even as we need it most Ranging over the main areas of global concern from security to the global economy and the environment this book examines these mechanisms of gridlock and pathways beyond them It is written in a highly accessible way making it relevant not only to students of politics and international relations but also to a wider general readership

Global Cooperation and the Human Factor in International Relations Dirk Messner, Silke Weinlich, 2015-12-14 This book aims to pave the way for a new interdisciplinary approach to global cooperation research It does so by bringing in disciplines whose insights about human behaviour might provide a crucial yet hitherto neglected foundation for understanding how and under which conditions global cooperation can succeed As the first profoundly interdisciplinary book dealing with global cooperation it provides the state of the art on human cooperation in selected disciplines evolutionary anthropology and biology decision sciences social psychology complex system sciences written by leading experts The book argues that scholars in the field of global governance should know and could learn from what other disciplines tell us about the capabilities and limits of humans to cooperate This new knowledge will generate food for thought and cause creative disturbances allowing us a different interpretation of the obstacles to cooperation observed in world politics today It also offers first accounts of interdisciplinary global cooperation research for instance by exploring the possibilities and consequences of global we identities by describing the basic cooperation mechanism that are valid across disciplines or by bringing an evolutionary perspective to diplomacy This book will be of great interest to scholars and postgraduates in International Relations Global Governance and International Development

Negotiations in the World Trade Organization Michal Parizek, 2019-10-10 This book examines the World Trade Organization WTO in the context of the global economy in the twenty first century arguing that many problems within the institution lie in the disparity between its design and the nature of its tasks Studying the global trade regime and the unsuccessful Doha round of trade liberalization negotiations this volume suggests that important institutional adjustments may be necessary for the WTO and other major international institutions to regain their ability to manage global economy It uses extensive new qualitative and quantitative evidence to identify systematic dysfunctions in how the Doha negotiations have been conducted and links these dysfunctions to the exclusively inter governmental design of interest representation in the WTO Based on this the book argues that global economic institutions should consider allowing broader parliamentary and non state representation of their members Presenting findings which can also be applied to other global economic institutions *Negotiations in the World Trade Organization* will be useful to students and scholars of international trade global governance and international political economy
