The Locales Framework G. Fitzpatrick,2013-06-29 So much technology works not by good design or by being a good fit to purpose but because people make it work because they have to for some reason We humans are incredibly creative and resourceful when it comes to getting something done There are numerous stories we

could all tell of the ingenious work arounds we've developed to make something do what we want it to or the enormous amount of time we've spent trying to find out how to make some technology work as we want e.g. trying to find out how to turn off auto editing commands in a word processing package when all we want is for it to do what we tell it. A good example of this principle was what motivated me to switch from neural networks to the area of Computer Supported Cooperative Work (CSCW) for my PhD research. I had undertaken a case study looking at the deployment of a multi-million dollar health information system throughout a hospital network.

Evidence-Based Clinical Supervision Derek L. Milne, 2009-03-12
Evidence Based Clinical Supervision critiques and summarises the best available psychological evidence relating to clinical supervision, clarifying the key principles, setting out the related practice guidelines and specifying the research and practice implications. A best practice guide to clinical supervision, an approach used across psychotherapy and health services where professionals meet regularly with each other to discuss casework and training issues. Summarises the best available clinical evidence relating to clinical supervision and relates this information to key principles with a strong applied focus, drawing out practice guidelines and implications. Aims to motivate health professionals to practice supervision with greater enthusiasm and proficiency. Represents the culmination of two years intensive research on supervision and twenty years of involvement in supporting and developing supervisors.

Digital Product Accessibility Azhar ul Haque Sario, 2025-10-10
Navigating the complex world of digital accessibility laws just got a whole lot easier. This book is your guide to digital accessibility across the globe. It takes you on a tour of more than 15 countries. We explore how different nations ensure technology is usable for everyone. You will learn about the laws that shape the digital world. See how the United States relies on court cases to define accessibility. Discover Canada's mix of federal and provincial rules. Understand the European Union's powerful market driven approach. We also journey through the unique systems in Australia, Japan, Brazil, South Korea and many more. Each chapter provides a clear structured look at a country's regulatory mandate. It shows how public and private organizations implement these rules in the real world. You'll see the innovation engines driving new assistive technologies. Most importantly, you will understand the human element and the crucial role of disability advocacy. While many books focus narrowly on technical guidelines or the laws of a single country, this book offers a unique comparative perspective that you won't find anywhere else. Our four part analytical framework examining the laws, practical implementation, innovation and the human element is applied consistently to every nation. This allows you to draw meaningful comparisons and understand why some approaches succeed while others fail. This book moves beyond theory and technical jargon. It connects the legal frameworks to the real world experiences of businesses, innovators and people with disabilities. It provides a holistic practical and global understanding that a standard compliance manual simply cannot offer, giving you the insights needed to create truly inclusive digital products. This author has no affiliation with the board and it is independently produced under nominative fair use.

Disrupted Urbanism Nancy Odendaal, 2023-01-16
The smart city is often promoted as a technology

driven solution to complex urban issues While commentators are increasingly critical of techno optimistic narratives the political imagination is dominated by claims that technical solutions can be uniformly applied to intractable problems This book provides a much needed alternative view exploring how home grown digital disruption driven and initiated by local actors upends the mainstream corporate narrative Drawing on original research conducted in a range of urban African settings Odendaal shows how these initiatives can lead to meaningful change This is a valuable resource for scholars working in the intersection of science and technology studies urban and economic geography and sociology
