

Stress Analysis of GRP/GRE/FRP piping system using CAESAR II

GRP products being proprietary the choice of component sizes, fittings and material types are limited depending on the supplier. Potential GRP vendors need to be identified early in design stage to determine possible limitations of component availability. The mechanical properties and design parameters varies from vendor to vendor. So it is utmost important that before you proceed for stress analysis of such systems you must finalize the GRP/FRP/GRE vendor. Several parameters (Fig. 1) for stress analysis have to be taken from vendor.

Stress analysis of GRP piping system is governed by ISO 14692 part 3. The GRP material being orthotropic the stress values in axial as well as hoop direction need to be considered during analysis. The following article will provide a guideline for stress analysis of GRP piping system in a very simple format.

Before you open the input spreadsheet of CAESAR II communicate with the vendor through mail and collect the following parameters as listed in Fig.1.

Applied Stress Analysis of Plastics S.I. Krishnamachari, L.J. Broutman, 2013-11-27 This book is a product of the understanding I developed of stress analysis applied to plastics while at work at L J Broutman and Associates UBA and as a lecturer in the seminars on this topic co sponsored by UBA and Society of Plastics Engineers I believe that by its extent and level of treatment this book would serve as an easy to read desktop reference for professionals as well as a text book at the junior or senior level in undergraduate programs The main theme of this book is what to do with computed stress To approach the theme effectively I have taken the stress category approach to stress analysis Such an approach is being successfully used in the nuclear power field In plastics this approach helps in the prediction of long term behavior of structures To maintain interest I have limited derivations and proofs to a minimum and provided them if at all as flow charts In this way I believe that one can see better the connection between the variables assumptions and mathematics
