These programs include finding new ways to supplement existing water supplies and greater acceptance of alternative supplies such as recycled waste water and desalination, green infrastructures, and rain and storm water harvesting. It concludes with two chapters on water management tools including asset management and strategic planning, which are of particular interest to small water and wastewater utilities.

Enabling the Iranian Gas Export Options Maximilian Kuhn, 2014-01-17. Maximilian Kuhn investigates one of the most pressing yet neglected subjects in the field of global energy politics: the integration of the Iranian gas market. Possessing the world's second largest proven natural gas reserves, Iran is a hypothetical energy giant in waiting. Yet over three decades of internal divisions coupled with crippling international sanctions have left Iran unable to capitalize on its vast energy potential. Increasing global demand for natural gas and a government in constant need of finding new sources of revenue to meet the needs of a fast-growing

population should lead Iran to eventually become a large scale gas exporter How this could take place and what the implications for global gas markets would be are the central research questions tackled by this study The study allows a look beyond international politics Iranian political decision making investment laws and pipeline games
