Malin, 2022-01-31 Generating understanding into how to more routinely foster evidence informed teaching practice globally this ground breaking handbook is vital reading for educational researchers and especially those working close to practice in all settings *Perspectives on Educational Governance* S. have a positive effect on student achievements if schools and teachers use the performance feedback from the exams for school instructional and professional development. However, very little is known about whether the exams are used for development at all and how this is affected by factors in the exam system and organizational aspects of schools. In a comparison of Finland, Ireland, and the Netherlands, the study therefore investigates how different exam systems and their functions, the conditions at school level, and the use of the exams for school and classroom development are associated. The study uses expert interviews and a questionnaire survey with principals and teachers. The role statewide exit exams can play in education systems is analyzed from a governance perspective and a school development perspective and discussed with an international comparative view.

Esther Dominique Klein, born in 1982, Dr. phil., is research assistant at the Faculty of Educational Sciences of the University of Duisburg-Essen. Her main research interests lie in the areas of school system and school development research and international comparative education.

**Governing Educational Spaces** Hans-Georg Kotthoff, Eleftherios Klerides, 2015-12-14. The governance of education in many countries and regions of the world is currently in transition, challenging histories, remaking subjectivities, and shaping possible futures. This book provides an up-to-date analysis and discussion of the cutting-edge theme of educational governance from an international comparative perspective. The volume explores the landscape of educational governance in its broadest sense, considering new forms of steering, leadership, and management, assessment and evaluation, teaching and learning, knowledge creation, and the realities and possibilities for different forms of political engagement. The new spatial dynamics of education are explored in institutional settings such as schools and universities and via professional groupings such as teachers, administrators, and leaders. The chapters in this book are based on the best peer-reviewed papers and keynote speeches which were delivered at the XXVI Conference of the Comparative Education Society in Europe (CESE) in June 2014 in Freiburg, Germany. Comparative Education is uniquely situated to explore the emerging dynamics of educational governance within changing and newly emerging educational spaces because it provides the opportunity to learn more about different local, national, or regional educational processes and trajectories and to share knowledge about the logics, ideologies, and impacts of different techniques and regimes of governance across Europe and beyond. Hans-Georg Kotthoff is Professor of Comparative Education and School Pedagogy at the University of Education, Freiburg, Germany, and President of the Comparative Education Society in Europe (CESE) since 2012. Eleftherios Klerides is Lecturer in Comparative Education and History of Education at the University of Cyprus and the Secretary/Treasurer of the Comparative Education Society in Europe (CESE).

Schul- und Unterrichtsreform durch ergebnisorientierte Steuerung Albrecht Wacker, Uwe Maier, Jochen Wissinger, 2012-03-23 Die Einföhrung sogenannter Neuer Steuerung im Schulsystem hat in jüngerer Zeit verstärkt die Frage aufgeworfen inwieweit die politisch und ökonomisch motivierten Reformen der Steuerung evidenzbasiert sind und welche Bedeutung die gewonnenen Informationen für die Praxis und die Politik besitzen Insgesamt stellt sich damit die Frage ob die Erwartungen und Optimierungshoffnungen der auf evidenzbasierte Steuerungsansätzen beruhenden Reformen auf schul und unterrichtspraktischer Ebene überhaupt erfüllt werden können Welche beabsichtigten und nicht beabsichtigten Effekte resultieren aus den neuen Steuerungsinstrumenten Dieser Band macht aktuelle empirische Forschung zum Steuerungsdiskurs zugänglich und zeigt einmal mehr die theoretischen und methodischen Implikationen einer neuen Steuerungsforschung

**International Perspectives on Leading Low-Performing Schools** Coby V. Meyers, Marlene J. Darwin, 2018-08-01 Research is clear School leadership quality matters However our knowledge of effective school leadership remains limited in at least three substantial ways First our understanding of school leadership effectiveness generally and school principal effectiveness specifically is limited to Western contexts primarily North America and western European ones Second even in the confines of Western research and context there has been relatively little specific focus on

effectively leading low performing schools Third even the conceptualization of leadership do we mean the school principal an administrative team or a broader school leadership team is a key factor in how we define and respond to the challenge of leading in low performing schools This book advances discussion and disseminates knowledge and global perspectives on what school leadership looks like how it is enacted and under what circumstances and when or where lessons might be portable We anticipate this book having wide appeal for researchers policymakers and practitioners considering school leadership and how to support it effectively The chapters suggest a noticeable level of convergence globally on how to lead low performing schools effectively Yet there are clear political and culture differences that add significant gradation to how school leaders might enact best practice locally or inform policymakers and systems leaders about how to set up school leaders for success and subsequently support them This book is one of the first that prioritizes the universality and nuance of leading low performing schools globally

**Trust, Accountability and Capacity in Education System Reform** Melanie Ehren, Jacqueline Baxter, 2020-12-29 This global collection brings a new perspective to the field of comparative

education by presenting trust capacity and accountability as the three building blocks of education systems and education system reform. In exploring how these three factors relate to student learning outcomes across different international contexts, this book provides a powerful framework for a more equal system. Drawing upon research and case studies from scholars, policymakers and experts from international agencies across five continents, this book shows how trust, capacity and accountability interact in ways and with consequences that vary among countries, pointing readers towards understanding potential leverage points for system change. *Trust, Accountability and Capacity in Education System Reform* illuminates how these three concepts are embedded in an institutional context, temporally, socially and institutionally, and offers an analysis that will be of use to researchers, policymakers and agencies working in comparative education and towards education system reform. **World Yearbook of Education 2020** Julie Allan, Valerie Harwood, Clara Rübner Jørgensen, 2019-09-30. A timely contribution to the debate on educational governance and equality, the *World Yearbook of Education 2020* documents the significant changes that have occurred in the last 20 years, reflecting a widespread shift from government to governance. Considering school context as well as specific school responses around the emergence of particular forms of governance, this book presents and contextualises a clear historical account of governance and accountability within schooling. Organised into three sections covering Changing contexts of school governance, stakeholders and responsabilisation, and radical governance, carefully chosen contributors provide global insights from around the world. They consider educational outcomes and closing the inequality gap, and they document radical forms of governance at local level which have sought to create more equitable governance, intelligent accountability and greater involvement of key stakeholders such as students. Providing a series of provocations and reminders of the possibilities that remain open to us, the *World Yearbook of Education 2020* will be of interest to academics, professionals and policymakers in education and school governance, and any scholars who engage in historical studies of education and debates about educational governance and equality.
