Logistics and Manufacturing Outsourcing James A. Tompkins, Steven W. Simonson, Bruce W. Tompkins, Brian E. Upchurch, 2005 This is unlike any outsourcing book you have seen because it is specifically designed for logistics and manufacturing executives To successfully outsource today you need to gain a core competency in outsourcing avoid setbacks and understand how to keep the outsourcing relationship robust Most organizations do not have outsourcing as a core competency and this is why so many outsourcing relationships fail Altogether the four authors of this book have nearly 100 years of solid experience in logistics and manufacturing outsourcing They have seen outsourcing from all angles either as providers consultants clients attorneys or expert witnesses and it is not always a pretty picture This expertise makes the authors uniquely qualified to teach companies how to harness the real power behind outsourcing

Western Societies Gijs Beets,Joop Schippers,Egbert R. te Velde,2010-12-06 Most people value to have children still highly But what is the optimal moment to have the first The decision on having children or not and if yes on the timing of the first is one of the most difficult ones to make also because it more or less coincides with various other heavy decisions on shaping the life course like on union formation labour market career housing accommodation etc People realise that having children will fundamentally change their life and in order to fit this unknown and irreversible adventure perfectly into their life course postponement of the first birth is an easy way out as long as doubts continue and partners try to make up their mind Modern methods of birth control are of course a very effective help in that period What is the best moment to have the first child And

to what moment is postponement justified There are no easy answers to these questions Best solutions vary per person as they depend on personal circumstances and considerations the partner may have conflicting ideas housing accommodation job income free time activities Existing parental leave and child care arrangements are weighted as well Unfortunately the biological clock ticks further And also unfortunately assisted reproductive technology IVF etc is unable to guarantee a successful outcome Several couples end up without children involuntarily and that may lead to sorrow and grief This interdisciplinary book overviews the process of postponement and its backgrounds in modern Western societies holistically both at the personal and the societal level Contributions come from reproductive evolutionary biological and neurological sciences as well as from demography economy sociology and psychology It holds not only at women but also at men becoming first time fathers The discussion boils down to a new policy approach for motherhood and emancipation on how to shape work and family life It is argued that a public window where one can compose a cafeteria like set of supportive arrangements according to personal preferences could lead to a break in the rising age at first motherhood
