**Hip Arthroscopy and Hip Joint Preservation Surgery** Shane J. Nho, Asheesh Bedi, Michael J. Salata, Richard C. Mather III, Bryan T. Kelly, 2022-08-01 The field of hip preservation surgery has evolved over the past decade as our understanding of hip pathomechanics and pathomorphology has expanded. The published literature on non-arthritic hip pathology, for example, has grown exponentially. The topics of controversy in the past decade have been answered in some cases, but new questions have also arisen. In addition to the 99 chapters in the original edition, most of which will be retained and updated as applicable, there will be over 30 brand-new chapters focusing on new and more sophisticated techniques from authors that have been the pioneers of the field. The text is divided into nine thematic sections covering the breadth of the topic and the current state of the art: basic science of the hip, operative basics for hip arthroscopy and open hip preservation surgery, pediatric hip conditions, approaches to disorders of the hip and pelvis, enthesopathy and neuromuscular disorders, hip fractures and instability, avascular necrosis, hip cartilage restoration, and oncologic conditions. Throughout, there is a heavy

Berry, Mark W. Pagnano, 2019-10 This title is part of the Tips and Tricks series we are developing in the orthopaedic surgery list based on Harborview's Illustrated Tips and Tricks in Fracture Surgery That title is unique in its approach in that it doesn't offer a comprehensive review of surgical procedures nor does it offer a comprehensive review of the knowledge base underlying orthopaedic trauma and its management Instead it offers the sort of wisdom attending surgeons pass on to residents or fellows about how to perform surgery These tips and tricks are often highly technical and also often highly contextual in this type of patient I tend to use approach X for these reasons while in other types of patients I do it this other way Residents and fellows often take notes on this advice These notes from the orthopaedic trauma fellows at Harborview served as the foundation for the first edition of the Harborview title This format is thus an adjunct to comprehensive procedural references not a competitor It sits in a unique and mostly vacant market niche and represents the stream of knowledge that is sometimes evidence based and sometimes not used to train surgeons This knowledge stream often contains nuggets unique to particular to institutions The success of the Harborview title attests to the value of this approach 4800 units sold to date in what has traditionally been viewed as the highly overpublished area of orthopaedic trauma This title will originate from the renowned orthopaedic surgery department at Mayo Clinic Rochester Dan Berry will oversee the hip content and Marc Pagnano the current chair will oversee the knee Coverage will include total hip and knee arthroplasties revision hip and knee arthroplasties hip arthroscopy hip resurfacing osteotomies for the hip and knee unicondylar knee replacement and more Currently in development Hospital for Special Surgery's Illustrated Tips and Tricks in Foot and Ankle Surgery Emory's Illustrated Tips and Tricks in Spine Surgery Illustrated Tips and Tricks in Sports Medicine Surgery Brad Henley is the series editor for this series He has held numerous positions for AAOS in addition to his role at Harborview and is very well connected As currently scoped additional topics in the series would be hand wrist elbow surgery pediatric orthopaedics with perhaps one volume on ped fxs and one on

everything else Because these titles will not present procedures step by step the areas need to be fairly broad in order to generate enough tips and tricks for a 300 400 pp book      Orthopaedic Knowledge Update 13: Ebook without Multimedia
