Manual Del Usuario: Base Interamericana Integrada de Datos Agropecuarios Y Socioeconomicos IICA-cidia, Manual on Sample-based Data Collection for Fisheries Assessment Per Sparre, Food and Agriculture Organization of the United Nations, 2000-01-01

This manual deals with the practical implementation of a routine data collection programme. The data collection programme is developed through a top down approach from the identification of the objectives down to the practical recording and management of data obtained from the fishery. The issues are dealt with both through detailed discussion and by using simple examples. The examples are mostly based on situations in tropical fisheries and in particular experience has been drawn from developing a data collection programme in Viet Nam. The main questions addressed in the manual are which fisheries data to collect where and when to collect them. Only data from commercial marine capture fisheries are considered. The methodologies used are mainly appropriate for a tropical developing country with many small artisanal vessels and a few large industrial vessels. The methodology is the sample based approach. The data collection methodology presented attempts to utilize whatever information can be obtained in practice in a developing country.
