Multinational Corporations and Foreign Direct Investment Stephen D. Cohen, 2007-02-03 Foreign direct investment FDI and multinational corporations MNCs for better and worse play a large and growing role in shaping our world The integrating thesis of this book is the inevitability of heterogeneity in FDI and MNCs and accordingly the imperative of disaggregation Large companies doing business on a global basis increasingly dominate the production and marketing of the world's goods and services The importance of these companies continues to grow while the debate about their nature and effects remains mired in a long standing stalemate couched in strong black and white terms Stephen D Cohen seeks to reconcile this impasse by analyzing multinational corporations and foreign direct investment in an eclectic nuanced manner The core thesis is that an accurate understanding of the nature and impact of these phenomena comes from acknowledging the dominance of heterogeneity perceptions and ambiguity and the paucity of universal truths This approach should contribute significantly to both a better academic understanding and a more productive policy debate of an increasingly important element of the world economy

Globalization and Language Teaching David Block, Deborah Cameron, 2002 This book considers the issues globalization raises for second language learning and teaching in an economy where the linguistic skills of workers is becoming increasingly important

The Donut Steven Penfold, 2008-01-01 In Canada the donut is often thought of as the unofficial national food Donuts are sold at every intersection and rest stop celebrated in song and story as symbols of Canadian identity and one chain in particular Tim Horton's has become a veritable icon with over 2500 shops across the country But there is more to the donut than these and other expressions of snackfood patriotism would suggest In this study Steve Penfold puts the humble donut in its historical context examining how one deep fried confectionary became not only a mass commodity but an edible symbol of Canadianness Penfold examines the history of the donut in light of broader social economic and cultural issues and uses the donut as a window onto key developments in twentieth century Canada such as the growth of a consumer society the relationship between big business and community and the ironic qualities of Canadian national identity He goes on to explore the social and political conditions that facilitated the rapid rise and steady growth of donut shops across the country Based on a wide range of sources from commercial and government reports to personal interviews The Donut is a comprehensive and fascinating look at one of Canada's most popular products It offers original insights on consumer culture mass consumption and the dynamics of Canadian history

Dictionary of Globalization Andrew Jones,2006-09-07 Publisher description Theorising Religion John

Walliss,2017-10-24 Religion is controversial and challenging Whilst religious forces are powerful in numerous societies they have little or no significance for wide swaths of public or private life in other places The task of theoretical work in the sociology of religion is therefore to make sense of this apparently paradoxical situation in which religion is simultaneously significant and insignificant The chapters of Part One consider the classical roots of ideas about religion that dominated sociological ways of thinking about it for most of the twentieth century Each chapter offers sound reasons for continuing to find theoretical inspiration and challenge in the sociological classics whilst also seeking ways of enhancing and extending their relevance to religion today Part Two contains chapters that open up fresh perspectives on aspects of modern post modern and ultra modern religion without necessarily ignoring the classical legacy The chapters of Part Three chart new directions for the sociological analysis of religion by fundamentally re thinking its theoretical basis by extending its disciplinary boundaries and by examining previously overlooked topics Restaurants and Dining Rooms Franziska Bollerey,Christoph Grafe,2019-03-26 According to urban academic myth the first restaurants emerged in the wake of the

French Revolution From the very beginning in the elegant salons of the latter days of the Ancien R gime the design of restaurants has been closely related to ideas of how food should be presented and how it may be consumed in public The appearance and atmosphere created by restaurant owners reflects culturally embedded ideals of comfort sociability and the good life As a product of the modern metropolis the restaurant encapsulates and illustrates the profound change in how its patrons viewed themselves as individuals how they used their cities and how they met friends or business partners over a meal The architectural design of environments for the consumption of food necessarily involves an exploration and a manipulation of the human experience of space It reflects ideas about public and private behaviour for which the restaurant offers a stage Famous architects were commissioned to provide designs for restaurants in order to lure in an ever more demanding urban clientele The interior designs of restaurants were often employed to present this particular aspect in consciously evoking an imagery of sophisticated modernity This book presents the restaurant its cultural and typological history as it evolved over time In this unique combination it provides valuable knowledge for designers and students of design and for everyone interested in the cultural history of the modern metropolis **Mother Jones Magazine** ,1996-05

Mother Jones is an award winning national magazine widely respected for its groundbreaking investigative reporting and coverage of sustainability and environmental issues **Globalization and Health** K. Lee,2003-12-09 There is widespread recognition that globalization is changing the world around us but so far there has been no systematic analysis of how it is impacting on human health Such impacts are diverse encompassing global economic political sociocultural technological and environmental changes Globalization and Health presents a clear conceptual framework for understanding these varied impacts and draws on a broad range of literature to illustrate them Kelley Lee emphasises that more attention is needed to ensure that current forms of globalization become more equitable sustainable and guided by appropriate forms of governance *Taking Food Public* Psyche Williams Forson,Carole Counihan,2013-09-13 The field of food studies has been growing rapidly over the last thirty years and has exploded since the turn of the millennium Scholars from an array of disciplines have trained fresh theoretical and methodological approaches onto new dimensions of the human relationship to food This anthology capitalizes on this particular cultural moment to bring to the fore recent scholarship that focuses on innovative ways people are recasting food in public spaces to challenge hegemonic practices and meanings Organized into five interrelated sections on food production consumption performance Diasporas and activism articles aim to provide new perspectives on the changing meanings and uses of food in the twenty first century *Zemiology and Human Trafficking* Avi Boukli,2023-12-05 Following the rise of the zemiological movement the concept of social harm has attracted a great deal of scholarly attention Using this perspective a number of scholars have sought to remove the constraining brackets surrounding criminological investigation in order to broaden its legitimate parameters of study and incorporate a wider range of un criminalized and hidden harms This book expands the literature on social harm by applying the concept of zemia to human

trafficking investigations in Europe North America and Africa This book draws attention not only to various structurally imbedded harms but also to the wider consequences of such harms Drawing on a range of international legal cases on trafficking this book offers a new direction in criminological and zemiological thinking and a reimagining of criminal justice responses to harm
