Tools for Conflict Resolution Ellen M. O'Keefe, Mary Catherine Stewart, 2004-04-09 Have you been searching for a way to resolve conflict that doesn't involve a series of ten or more steps Do you think that perhaps a key to conflict resolution must come from within How can teachers and pre-service teachers help their students learn and use strategies for conflict resolution Tools for Conflict Resolution is a practical method for teaching conflict resolution skills to students in grades K-12

Conflict is a part of everyone's life. It is the author's belief that if each student is given tools for handling conflict and these tools are used each time conflict arises that soon students become proficient conflict managers. This book begins with a chapter which introduces Peter Senge's five disciplines: Personal Mastery, Mental Models, Shared Vision, Team Building, and Systems Thinking. After reading this chapter, the reader is able to embrace the five disciplines and begin practicing the adult level. As teachers, we teach from who we are. The rest of the book is filled with actual lesson plans which are directly tied to the Multiple Intelligences Theory and are developmentally appropriate for students. Case studies, role plays, skits, literature, songs, and cooperative learning activities are the primary instructional methods used to teach students conflict resolution skills. An annotated bibliography is included to assist teachers in extending lessons. These lessons may be taught during Social Studies as a unit on character education or could be used during a guidance class.

Getting MORE Excited About USING Data Edie L. Holcomb, 2017-02-23 Put data to WORK to better meet the needs of all students. Have you become hyper-focused on state tests? Do you have important data collected, warehoused, and gathering dust? The time has come to dust off that data and put it to work for your students. The new reporting requirements under ESSA combined with the flexibility to act on that data provide a huge opportunity for education leaders. This is your opportunity to rebuild data processes and rekindle excitement about using data for school and student growth. **Getting MORE Excited About USING Data** addresses both cultural and technical aspects of using data, starting with underlying beliefs about students, assessment, and individual and collective teacher efficacy. This updated edition features Guiding questions and protocols for effective professional learning communities, shared leadership teams, and subject grade teaching teams. New material on the use of formative assessment in schoolwide planning and instructional design. Renewed focus on the role of students. Tips on the electronic challenges of storage, retrieval, privacy, and security. Real-life examples from schools and districts ranging from specific data displays to sustained long-term change. The straightforward language, adaptable models, and focus on human elements make **Getting MORE Excited About USING Data** an essential resource for every leader. The time is now to use data to establish a collaborative culture with student success at its core. Holcomb leads educators to use data as a catalyst to foster their passion for continuous learning. I highly recommend her pragmatic approach in looking at data as a means to stir the hearts and minds of educators for the sake of our future human resources: the students we serve. Kathy Larson, Author *Coaching for Infinite Results*. This book is full of practical supports, resources, and illustrations. It is well-grounded in the work of schools and the importance of data to that mission. Megan Tschannen-Moran, Professor of Educational Leadership, College of William Mary, Williamsburg, VA.
