Torrance,2005-07-20 This book examines the implications of the Judaeo Christian claim for our understanding of the universe that it is contingent freely created by God out of nothing and having an existence freedom and rational order of its own while still dependent on him Professor Torrance argues that this claim made possible the development of western empirical science but that Newtonian physics obscured the connection between the

rational order of nature and the Christian doctrine of creation He shows how modern relativity and quantum theories have once again drawn attention to the significance of contingency and imply that the universe is found to be consistently rational only if it is dependent on a creative rationality beyond it He considers finally the disorderly elements in the universe both physical and moral and argues that the doctrine of incarnation as well as of creation is necessary to deal with the intellectual problems which they raise *Unmasking Biblical Faiths* Charles W.
