God Creation And Climate Change A Catholic Response To The Environmental Crisis:

God, Creation, and Climate Change Richard W. Miller (II.), 2010 Leading theologians and ethicists reflect on the most serious crisis of our time offering insights from theology history and ethics to aid in the transformation required to meet it The magnitude of the problem of environmental degradation and climate change requires a complete rethinking and reorientation of our way of being in the world Responding to this crisis requires not only a conversion of the will but even more fundamentally a transformation of the imagination that is the capacity to think of other ways of being thinking and acting in the world These original essays by a distinguished group of Catholic scholars assess the gravity of the situation and offer resources from biblical and theological traditions for the necessary mobilization of will and the conversion of our imaginations Book jacket How the World's Religions are Responding to Climate Change Robin Globus Veldman, Andrew Szasz, Randolph Haluza-DeLay, 2013-09-11 A growing chorus of voices has suggested that the world's religions may become critical actors as the climate crisis unfolds particularly in light of international paralysis on the issue In recent years many faiths have begun to address climate change and its consequences for human societies especially the world's poor This is the first volume to use social science to examine how religions are helping to address one of the most significant and far reaching challenges of our time While there is a growing literature in theology and ethics about climate change and religion little research has been previously published about the ways in which religious institutions groups and individuals are responding to the problem of climate change Seventeen research driven chapters are written by sociologists anthropologists geographers and other social scientists This book explores what effects religions are having what barriers they are running into or creating and what this means for the global struggle to address climate change Christian Faith and Environmental Stewardship Daniel K. Lagat, 2019-03-15 This book covers the contribution of Christianity in the care stewardship and management of the environment It uses ideas from the logical position of a Christian created in God's image redeemed by God and given responsibility to subdue and keep the earth arguing that a Christian has the responsibility and mandate to care for the environment It shows that successful stewardship happens when a Christian is aware of God's intention for creation exerts effort to increase it and is expected to give an account to God for their actions toward it The book presents environmental concerns in Kenya as an opportunity for change describing situations and why they could become opportunities for change Seven worldviews are presented that discourage Christians who want to do environmental stewardship and Christian theological doctrines are discussed that could be used to cause ecclesial participation in environmental stewardship Finally the book envisions a Conserving Church with specific activities the church can do to successfully influence people to do environmental stewardship Creation and Salvation: A companion on recent theological movements E. M. Conradie, 2012 Christians trying to save the planet have to relate creation with salvation This volume explores the ways in which this task is approached by a wide range of recent theological movements Climate
