The God Equation Michio Kaku, 2021-04-06 1 NEW YORK TIMES BESTSELLER The epic story of the greatest quest in all of science the holy grail of physics that would explain the creation of the universe from renowned theoretical physicist and author of *The Future of the Mind* and *The Future of Humanity* When Newton discovered the law of gravity he unified the rules governing the heavens and the Earth Since then physicists have been placing new forces into ever grander theories But perhaps the ultimate challenge is achieving a monumental synthesis of the two remaining theories relativity and the quantum theory This would be the crowning achievement of science a profound merging of all the forces of nature into one beautiful magnificent equation to unlock the deepest mysteries in science What happened before the Big Bang What lies on the other side of a black hole Are there other universes and dimensions Is time travel possible Why are we here Kaku also explains the intense controversy swirling around this theory with Nobel laureates taking opposite sides on this vital question It is a captivating gripping story what is at stake is nothing less than our conception of the universe Written with Kaku's trademark enthusiasm and clarity this epic and engaging journey is the story of *The God Equation* *God in the Equation* Corey Powell, 2003-08-12 Identifies the impact of Einstein's theories of relativity on the history of religion citing his self rejected invention of Lambda to cite God's metaphysical role in the universe and considering such topics as dark energy and dark matter Summary of The God Equation Alexander Cooper, 2021-06-13 Summary of The God Equation Chapter 1 The same year Galileo Galilei died a broken man in his prison cell another legend was born in London For Kaku Isaac Newton is the greatest scientist who has ever lived and the modern dream of a unified theory began with him At a time when the church had taught only two laws on Earth and in the heavens Newton's idea proposed a unification that encompassed both The results of his experiments allowed him to conclude that terrestrial and heavenly physics work the same opening the world's eyes to the concept of forces Another remarkable characteristic of Newton's laws was its symmetry An equation is said to be symmetric when it stays invariant even after its parts are rearranged Newton's laws allowed for science to advance at unimaginable levels and his masterpiece Principia is considered one of the field's greatest scriptures Decades after Newton came Michael Faraday and James Clerk Maxwell who unified the concepts of electricity and magnetism laying the foundations of electromagnetism Faraday discovered the existence of magnetic fields which since then have been used to express all known forces in the universe His work laid the foundation for Maxwell's equations who made astonishing developments in physics In 1886 Heinrich Hertz achieved a scientific milestone using Maxwell's equations and To be continued Here is a Preview of What You Will Get A Full Book Summary An Analysis Fun quizzes Quiz Answers Etc Get a copy of this summary and learn about the book **The God Equation** Bobby Lynn, 2008-05 Scientists and believers have been at odds for thousands of years This age old human conflict is based on the faulty logic that the words God and science don't belong in the same book together never mind the same sentence Wrong The bible is not only the oldest but the most

reliable scientific text in our world today and God is the greatest scientist *Summary of Michio Kaku's The God Equation* Everest Media,2022-04-30T22:59:00Z Please note This is a companion version not the original book Sample Book Insights 1 The quest to find a single theory that would unite all the forces of the cosmos and choreograph everything from the motion of the expanding universe to the most minute dance of subatomic particles was undertaken by some of the most eminent physicists in the world 2 The road to the unified field theory which is the theory that explains the universe was not made of point particles but of tiny vibrating strings has been littered with the corpses of failed attempts But many leading physicists believe that we are finally converging on the solution 3 String theory is a theory of everything but it also predicts a multiverse of universes This means that it may have an infinite number of solutions If our universe is one of many possibilities then which one is ours *Equation of God* Rocky Cosmo Manu,2010-04-13 Throughout early and modern history many men have pondered the questions how why and what created the universe Of course most of these questions in early history were simply answered by appealing to the notion of a God or Gods However modern culture has progressed to a stage where these notions of God or Gods and their definitive meanings have to be questioned For example who exactly is God What is God Where does God exist in relation to the universe What role did God play in the creation of the universe Mans relationship to God must also be questioned his mind his thoughts his soul where is the connection Life death life after death where does it fit in to Gods big picture because for us to truly understand Gods purpose for existence we must first understand Gods method of creation For Gods method of creation will unlock mans mind and spirit from its physical boundary of isolation This book is a philosophical approach to the reality of creation evolution and the paradox of the universe it deals with Gods spiritual entity This is an answer to a question and an observation which forms a mental as well as visual understanding that climaxes into an equation of God God's Equation Amir D. Aczel,1999-12-12 **Putting God Into Einstein's Equations** Marcia Pollock,2012-04 Putting God Into Einstein s Equations Energy of the Soul is the direct outcome of an unusual and unique collaboration by soul mates Marcia and Jerry Pollock spanning the spiritual and physical worlds Marcia is deceased and her contributions come from the powerful intelligent energy of her Divine soul which is without her physical body in the spirit world Jerry is alive with his Divine soul which is constrained within his physical body on planet Earth Communicating through thought energy telepathy or channeling the authors have written this exquisitely simply explained book in their humble attempt of gratitude to bring new knowledge to the understanding of God s Essence and our world The Creator Himself has endorsed our book TRUTH LOVE AND WISDOM LIE WITHIN THESE PAGES Putting God Into Einstein s Equations Energy of the Soul is a provocative book that will stay with you long after you finish reading it Have you ever wondered about how a psychic contacts a spirit or where God comes from The book answers questions about God the big bang Einstein s Relativity Equations and how they fit in with God s energy soul mates and love the spirit world of souls past lives telepathic thought energy communication channeling removing negative body soul energy intelligence of the

Heizer, 2020-03-17 The book *One Simple Equation* will take the reader on an inventive journey exploring Christian faith by introducing a revolutionary mathematical equation An equation that helped the author a devout atheist for forty two years discover and understand with complete clarity the truth of the Gospel and the power of God's love After coming to the realization that some of the greatest most promising theories

in modern science share the same narrative as the Biblical description of creation God placed on author David Heizer's heart an equation that would ultimately bring him to Jesus Christ The equation $F \cdot T \cdot L = 3$ is a simple expression of Christian faith It is of profound importance that this book is rooted in God's love and His greatest expression of that love Jesus Christ The reader will learn why a mathematical expression of Christian faith illustrates our belief in God and Christ as our saviour so concisely All people understand Mathematics making it a universal language understood by all regardless of race nationality ethnicity or language $1 + 1 = 2$ is the same for all human beings Math is also the language of God as all things in the universe God's creation can be expressed mathematically from the swirling motion of the planets and stars and the human genome to the computer programs and phone apps we use every day This fascinating equation will reveal to the reader Biblical truth and understanding Inspired by Einstein's theory of relativity and God himself the equation is broken down into three simple terms F representing Faith what we are solving for T representing Trust which is a variable that changes from one day to the next and L representing God's Love a steadfast never changing never failing constant we can all rely on Raising God's love to the power of three represents the Trinity the Father Son and Holy Spirit The more Trust we apply to God's love the greater our faith becomes Read the testimonies of people getting through life's most difficult challenges by placing their trust in God's love The reader will then be taken through a series of chapters that replace the constant love of God with other idolatrous terms such as money material possessions addictions and the self and how these temporary corruptible terms fail at producing a sound faith on which to build life giving principles This one simple equation unlocks the meaning of life and answers one of the most difficult questions facing Christians today How can a loving God allow bad things to happen to good people This simple yet profound illustration of our faith reveals all this and much more The Mathmos Mike

Hockney, 2014-09-12 The universe is nothing like how it appears to us So what's it really like What is it in itself Neither our senses nor any experiments can reveal the ultimate truth of existence Fortunately one thing can reason We inhabit the Mathmos the mathematical cosmos This book reveals the compelling secrets of the hidden reality that we will never once see but we can surely know thanks to mathematics Do we live in a rational universe or a random universe This is the choice between a mathematical universe and a scientific universe The mathematical universe has a rational ultimate answer the scientific universe does not The scientific universe is magicked out of non existence as if out of a magician's top hat Are you a member of the magicians cult of science Nothing is more alchemical than modern science You can generate a cosmos out of randomness in nothingness which is a much greater trick than merely manufacturing gold from lead **Summary of the**

There s a huge hole in how humanity thinks about reality The problem is a very old one but only a tiny group of philosophers ever took an interest in it To the average person it s an obscure and unfathomable issue To the truly intelligent it s the key to understanding existence To clarify this issue is to get rid of so much junk in the way of humanity s ability to explain reality If you consider yourself one of the smartest people in the world you have to do what unintelligent people never do and that s to become interested in the most rarefied topics topics which seem absurd to the simple minded to the sort of people who aren t in the game of explaining reality and never could be The topic of universals versus particulars is about as unlikely as it gets for understanding our existence and yet that s exactly where we must look to find the ultimate answers This debate allows us

to makes sense of a foundational problem of science why science is totally dependent on mathematics even though the mathematical method contradicts the scientific method in every way Mathematics is for thinking types rationalists science for sensing types empiricists These are two totally different types of people Never get them confused You have to choose a side The supreme question is whether reality is scientific material particular sensible or mathematical mental universal intelligible To put it another way is reality dead or alive Is it a mechanism or an organism Is it stupid with no purpose as science says or is it intelligent and relentlessly calculating the answer to itself and driving itself to perfect completion as it must if it is mathematical Are you smart enough to understand the answer Most people aren't According to Kurt Godel a global conspiracy has been in place for centuries to stop humanity from studying Leibniz the supreme rationalist and thus through this neglect to make men stupid There might as well be a global conspiracy given how far mathematical rationalism has fallen in order to create space for scientific empiricism its philosophical opposite Scientists the people of the senses even claim to be champions of reason and logic As if It's time for the greatest paradigm shift of all from scientific empiricism to mathematical rationalism from sensing to thinking from observation to logic from matter to mind

The Mathematical Universe Mike Hockney, 2014-09-12 The universe is a mathematical hologram It's made of ontological mathematics It's a living thinking self-optimising holographic organism composed of immortal indestructible ontological mathematical units called monads defined by the most powerful and beautiful equation in the whole of mathematics Euler's Formula Monads have a much more resonant name souls We all inhabit Soul World a wondrous immaterial Singularity outside space and time Our souls are individual mathematical singularities autonomous uncaused uncreated dimensionless frequency domains Via Fourier mathematics these imperishable immaterial monadic souls can collectively create the spacetime domain of the material world Where each soul is a single frequency domain the material world of space and time is their collective Fourier output What is matter It's simply dimensional energy energy existing in the Fourier spacetime domain rather than in the Fourier dimensionless frequency domain Welcome to Soul World
