*Goethe's Theory of Colours* Charles Lock Eastlake, 2020-07-27 Reproduction of the original Goethe's Theory of Colours by Charles Lock Eastlake      **Theory of Colours** Johann Wolfgang von Goethe, 2012-03-13 The author of Faust provides a unique perspective on the nature of color compensating for his scientific inaccuracy with inimitable prose and stimulating ideas      **Goethe's Theory of Colours** Wolfgang von Goethe, Anna Magdalena Johannsen, 2020-09-28 It became necessary to connect all these incongruous parts and additions by the strangest galleries halls and passages All damages whether inflicted by the hand of the enemy or the power of time were quickly made good As occasion required they deepened the moats raised the walls and took care there should be no lack of towers battlements and embrasures This care and these exertions gave rise to a prejudice in favour of the great importance of the fortress and still upheld that prejudice although the arts of building and fortification were by this time very much advanced and people had learnt to construct much better dwellings and defences in other cases But the old castle was chiefly held in honour because it had never been taken because it had repulsed so many assaults had baffled so many hostile operations and had always preserved its virgin renown This renown this influence lasts even now it occurs to no one that the old castle is become uninhabitable Its great duration its costly construction are still constantly spoken of Pilgrims wend their way to it hasty sketches of it are shown in all schools and it is thus recommended to the reverence of susceptible youth Meanwhile the building itself is already abandoned its only inmates are a few invalids who in simple seriousness imagine that they are prepared for war Thus there is no question here respecting a tedious siege or a doubtful war so far from it we find this eighth wonder of the world already nodding to its fall as a deserted piece of antiquity and begin at once without further ceremony to dismantle it from gable and roof downwards that the sun may at last shine into the old nest of rats and owls and exhibit to the eye of the wondering traveller that labyrinthine incongruous style of building with its scanty make shift contrivances the result of accident and emergency its intentional artifice and clumsy repairs Such an inspection will however only be possible when wall after wall arch after arch is demolished the rubbish being at once cleared away as well as it can be To effect this and to level the site where it is possible to do so to arrange the materials thus acquired so that they can be hereafter again employed for a new building is the arduous duty we have undertaken in this Second Part Should we succeed by a cheerful application of all possible ability and dexterity in razing this Bastille and in gaining a free space it is thus by no means intended at once to cover the site again and to encumber it with a new structure we propose rather to make use of this area for the purpose of passing in review a pleasing and varied series of illustrative figures      Goethe's Theory of Colours Johann Wolfgang von Goethe, 2019-09-24 Theory of Colours is a book by Johann Wolfgang von Goethe about the poet's views on the nature of colours and how these are perceived by humans It was published in German in 1810 and in English in 1840      Goethe's Theory of Colour Johann Wolfgang Von Goethe, 2015-11-30 Excerpt from the Preface It may naturally be asked whether in proposing to treat of

colours light itself should not first engage our attention to this we briefly and frankly answer that since so much has already been said on the subject of light it can hardly be desirable to multiply repetitions by again going over the same ground Indeed strictly speaking it is useless to attempt to express the nature of a thing abstractedly Effects we can perceive and a complete history of those effects would in fact sufficiently define the nature of the thing itself We should try in vain to describe a man s character but let his acts be collected and an idea of the character will be presented to us The colours are acts of light its active and passive modifications thus considered we may expect from them some explanation respecting light itself

**Goethe's Theory of Colours** Johann Wolfgang von Goethe,1840 Goethe's Theory of Colours Johann Wolfgang von Goethe,1840 This work by Johann Wolfgang von Goethe 1749 1832 was translated into English in 1840 by Sir Charles Eastlake 1793 1865 painter and later keeper of the National Gallery Goethe s 1810 work was rejected by many contemporary scientists because it appeared to contradict the physical laws laid down by Newton However its focus on the human perception of the colour spectrum as opposed to the observable optical phenomenon was attractive to and influential upon artists and philosophers As Eastlake says in his preface the work s dismissal on scientific grounds had caused a well arranged mass of observations and experiments many of which are important and interesting to be overlooked Eastlake also puts Goethe s work into its aesthetic and scientific context and describes its original reception His clear translation of Goethe s observations and experiments on colour and light will appeal to anyone interested in our responses to art
