Still Lives Ofer Ashkenazi, Sarah Wobick-Segev, Rebekka Grossmann, Shira Miron, 2025-01-07

How German Jews used photographs to document their experiences in the face of National Socialism. *Still Lives* is a systematic study of the ways Jews used photographs to document their experiences in the face of National Socialism. In a time of intensifying anti-Jewish rhetoric and policies, German Jews documented their lives and their environment in tens of thousands of photographs. German Jews of considerably diverse backgrounds took and preserved these photographs; professional and amateurs of different ages, gender, and classes. The book argues that their previously overlooked photographs convey otherwise unuttered views, emotions, and self-perceptions. Based on a database of more than fifteen thousand relevant images, it analyzes photographs within the historical contexts of their production, preservation, and intended viewing, and explores a plethora of Jews' reactions to the changing landscapes of post-1933 Germany. Here, the authors claim that these reactions complement, complicate, and sometimes undermine the contents of contemporaneous written sources. *Still Lives* develops a new methodology for historians to use while reading and analyzing photographs and shows how one can highlight an image's role in a narrative that comments on and assigns meaning to the reality it documents. In times of radical uncertainty, numerous German Jews used photography to communicate their intricate, confused, and conflicting expectations, fears, and beliefs. Through careful analysis of these photographs, this book lays the foundations for a new history of the German Jewish experience during the National Socialist years.

Ernst Boerschmann was the most influential foreign architectural researcher in China in the first half of the twentieth century. This book concerns his three-year research expedition through the Chinese Empire, 1906-1909. He was the first Westerner to systematically document China's religious architecture, returning from his travels with thousands of photographs, sketches, and architectural surveys. His six major publications, leading up to 1931, described here, alongside the reactions they caused, were milestones on the path to formal study of Chinese architectural history, long before Chinese academics themselves began to take interest in the subject in the 1930s.
