1827 1861 was an English anatomist and surgeon most notable for publishing the book Gray's Anatomy. He was elected a Fellow of the Royal Society (FRS) at the age of 25. While still a student, Gray secured the triennial prize of the Royal College of Surgeons in 1848 for an essay entitled 'The Origin, Connexions and Distribution of nerves to the human eye and its appendages' illustrated by comparative dissections of the eye in other vertebrate animals. In 1852 at the early age of 25 he was elected a Fellow of the Royal Society and in the following year he obtained the Astley Cooper prize of three hundred guineas for a dissertation 'On the structure and Use of Spleen'.

Gray's Anatomy John Crocco, Henry Gray, 1987-11-23 This is a landmark edition of one of the greatest texts of our time. Gray's Anatomy has been an international bestseller for 100 years; its appeal is not only to physicians and students but to artists and the medically curious. As the new Introduction by Dr Crocco states: 'Every living physician today has been exposed to Gray's Anatomy and nearly everyone has used it. It was Gray's Anatomy that occupied most of the embryonic physician's waking hours whether at home or at the side of his cadaver. There have been many imitations but few real competitors. There have been dissection manuals and pictorial atlases brilliantly illustrated with exquisite photographs. There have been synopses of anatomy and there have been monographs on various regions of the body. However, there is only one Gray's Anatomy. This stellar book represents the acme of anatomical description over the last century and will probably still be the premier text in anatomy over the next one hundred years. This commemorative edition is a very fitting tribute to Dr Henry Gray, Fellow of the Royal College of Surgeons whose colossal work will be remembered by medical historians past and future and by twentieth century physicians and surgeons as the anatomy text of our age.'

Anatomy of the Human Body Henry Gray, 1918 Gray's Anatomy Henry Gray, 2001 **The Making of Mr Gray's Anatomy** Ruth Richardson, 2008-10-23 Gray's Anatomy is probably one of the most iconic scientific books ever published: an illustrated textbook of anatomy that is still a household name 150 years since its first edition, known for its rigorously scientific text and masterful illustrations as beautiful as they are detailed. 'The Making of Mr Gray's Anatomy' tells the story of the creation of this remarkable book and the individuals who made it happen: Henry Gray, the bright and ambitious physiologist poised for medical fame and fortune who was the book's author; Carter, the brilliant young illustrator; lacking Gray's social advantages, shy and inclined to religious introspection; and the publishers, Parkers, father and son, the father eager to employ new technology, the son part of a lively circle of intellectuals. It is the story of changing attitudes in the mid 19th century of the social impact of science, the changing status of medicine, of poverty and class, of craftsmanship and technology. And it all unfolds in the atmospheric milieu of Victorian London, taking the reader from the smart townhouses of Belgravia to the dissection room of St George's Hospital and to the workhouses and mortuaries where we meet the friendless poor who would ultimately be immortalised in Carter's engravings. Alongside the story of the making of the book itself, Ruth Richardson reflects on what made Gray's Anatomy such a unique intellectual, artistic and cultural achievement, how it represented a summation of a long half-century's blossoming of anatomical knowledge and exploration, and how it appeared

just at the right time to become the Doctor s Bible for generations of medics to follow Gray's Anatomy ,2010
