Paradise Planned Robert A.M. Stern, David Fishman, Jacob Tilove, 2013-12-03 Paradise Planned is the definitive history of the development of the garden suburb a phenomenon that originated in England in the late eighteenth century was quickly adopted in the United State and northern Europe and gradually proliferated throughout the world These bucolic settings offered an ideal lifestyle typically outside the city but accessible by streetcar train and automobile Today the principles of the garden city movement are once again in play as retrofitting the suburbs has become a central issue in planning Strategies are emerging that reflect the goals of garden suburbs in creating metropolitan communities that embrace both the intensity of the city and the tranquility of nature Paradise Planned is the comprehensive encyclopedic record of this movement a vital contribution to architectural and planning history and an essential recourse for guiding the repair of the American townscape

Boomburbs Robert E. Lang, Jennifer B. LeFurgy, 2007-10-01 A glance at a list of America's fastest growing cities reveals quite a surprise most are really overgrown suburbs Places such as Anaheim California Coral Springs Florida Naperville Illinois North Las Vegas Nevada and Plano Texas have swelled to big city size with few people really noticing including many of their ten million residents These boomburbs are large rapidly growing incorporated communities of more than 100 000 residents that are not the biggest city in their region Here Robert E Lang and Jennifer B LeFurgy explain who lives in them what they look like how they are governed and why their rise calls into question the definition of urban Located in over twenty five major metro areas

throughout the United States numerous boomburbs have doubled tripled even quadrupled in size between census reports Some are now more populated than traditional big cities The population of the biggest boomurb Mesa Arizona recently surpassed that of Minneapolis and Miami Typically large and sprawling boomburbs are accidental cities but not because they lack planning Many are made up of master planned communities that have grown into one another Few anticipated becoming big cities and unintentionally arrived at their status Although boomburbs possess elements found in cities such as housing retailing offices and entertainment they lack large downtowns But they can contain high profile industries and entertainment venues the Los Angeles Angels of Anaheim and Arizona Cardinals are among over a dozen major league sports teams who play in the boomburbs Urban in fact but not in feel these drive by cities of highways office parks and shopping malls are much more horizontally built and less pedestrian friendly than most older suburbs And contrary to common perceptions of suburbia they are not rich and elitist Poverty is often seen in boomurb communities of small single family homes neighborhoods that once represented the American dream Boomburbs are a quintessential American landscape embodying much of the nation s complexity expansiveness and ambiguity This fascinating look at the often contradictory world of boomburbs examines why America s suburbs are thriving and how they are shaping the lives of millions of residents

Planning the Good Community Jill Grant,2006 An examination of new urban approaches both in theory and in practice Taking a critical look at how new urbanism has lived up to its ideals the author asks whether new urban approaches offer a viable path to creating good communities With examples drawn principally from North America Europe and Japan **Planning the Good Community** explores new urban approaches in a wide range of settings It compares the movement for urban renaissance in Europe with the New Urbanism of the United States and Canada and asks whether the concerns that drive today s planning theory issues like power democracy spatial patterns and globalisation receive adequate attention in new urban approaches The issue of aesthetics is also raised as the author questions whether communities must be more than just attractive in order to be good With the benefit of twenty years hindsight and a world wide perspective this book offers the reader unparalleled insight as well as a rigorous and considered critical analysis

Yamamura, Kent Koth, 2023-07-03 While an increasing number of universities have or are committed to engaging their campuses in their surrounding communities many recognize they lack the strategic focus and resources to maximize and sustain their impact on those communities Place based community engagement provides a powerful way to creatively connect campus and community to foster positive social transformation In developing community engagement strategies most universities and community organizations face significant challenges in deciding who to partner with and why Frequently this leads universities and community organizations to say yes to too many opportunities which significantly limit their ability to pursue long term impact Focusing on an established geographic area can make it much easier to decide where to deploy resources and which partnerships to prioritize and thus increase their ability to form strong and sustainable partnerships that are of greater value to all stakeholders This book presents the emerging model of place based community engagement as a powerful process for attaining more positive and enduring results in their local communities as well as stimulating wider engagement by campus constituencies Drawing upon the concept of collective impact and using data driven decision making place based initiatives build long term partnerships based upon a shared vision Done thoughtfully these place based initiatives have attained impressive results Drawing upon the case studies of five institutions that have implemented place based community engagement initiatives the authors provide guidance on the opportunities challenges and considerations involved in putting a place based approach into effect By sharing the experiences of these five institutions they describe in detail the routes each took to turn their place based initiatives from concept to reality and the results they achieved The Issues Affecting Rural Communities in the Southwest United States.
