Great Zimbabwe New Aspects Of Archaeology:

Great Zimbabwe Peter S. Garlake, 1973 History's Mysteries Brian Haughton, 2025-09-12 History's Mysteries is an absorbing and meticulously researched exploration of the archaeology history and mysteries of 35 ancient places worldwide Haughton's book takes the reader on an unforgettable journey from the 8 000 year old stone circle of Nabta Playa to India's magical Taj Mahal from Rhode Island's controversial Newport Tower to the enigmatic Royston Cave in the UK from the strange medieval castle village of Rennes le Chateau to the massive ancient walled city of Great Zimbabwe Using the latest archaeological evidence History's Mysteries explores The incredible archaeological discoveries at the 11 000 year old sanctuary of Gobekli Tepe in Turkey The heated debate over the 47 million year old Ida Fossil could it be the missing link in our evolutionary history The reality behind controversial ancient artifacts such as the Iron Pillar of Delhi the Oak Island Treasure and Egypt's Dendera Lamps What really happened to the Neanderthals With 36 photographs and illustrations this is the perfect reference work for those fascinated by the great mysteries of ancient history **African Democratic Montage** E. Ike Udogu, 2025-03-10 African Democratic Montage Case Studies on Ghana Zimbabwe Tanzania Ethiopia and Kenya explores the challenges African states face in achieving democratic consolidation The book highlights that these countries have constitutional tools human rights frameworks the African Union's code of leadership and democratic election principles to foster good governance However their varied application of these tools leads to different democratic outcomes Coincidentally the book addresses the resurgence of military coups in some African countries exposing democracy's fragility and calling for solutions to prevent future coups It provides a brief history of each country's pre colonial colonial and post colonial periods showcasing their unique democratic journeys The volume notes that the struggle for democratic consolidation is hindered by issues in electoral contests and human rights violations Nevertheless it suggests that enforcing constitutional human rights and adhering to African Union declarations can promote good governance democratic consolidation peaceful coexistence and national cohesion *Anthropology and Slavery at the Dawn of White Supremacy* Michael L. Blakey, 2025-07-18 This volume examines biological and cultural data that debunk a primordial basis for racism It tracks the ancient history of all social inequity to agricultural and feudal societies The book then focuses on social and ideological developments in European societies associated with religious justifications for the enslavement of others The European Enlightenment built upon those prejudices with ideas about nature and acceptable natural causes of unequal social status for people newly classified into biological races Nineteenth century anthropology is critiqued by African diasporic scholars who are the first Americans to argue that nurture rather than nature is responsible for human variation The American Civil War brought slavery nearly to an end but racist science continued to grow as eugenics applied to justify otherwise unjustifiable structures of human inequality such as Jim Crow segregation as though they are morally sound In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates

a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies

The Silence of Great Zimbabwe Joost Fontein, 2016-06-03 This book examines the politics of landscape and heritage by focusing on the example of Great Zimbabwe National Monument in southern Zimbabwe The controversy that surrounded the site in the early part of the 20th century between colonial antiquarians and professional archaeologists is well reported in the published literature Based on long term ethnographic field work around Great Zimbabwe as well as archival research in NMMZ in the National Archives of Zimbabwe and several months of research at the World Heritage Centre in Paris this new book represents an important step beyond that controversy over origins to focus on the site s position in local contests between and among individuals within the Nemanwa Charumbira and Mugabe clans over land power and authority To justify their claims chiefs spirit mediums and elders of each clan make appeals to different but related constructions of the past Emphasising the disappearance of the Voice that used to speak there these narratives also describe the destruction alienation and desecration of Great Zimbabwe that occurred and continues through

the international and national archaeological and heritage processes and practices by which Great Zimbabwe has become a national and world heritage site today Handbook of Research on Theoretical Perspectives on Indigenous Knowledge Systems in Developing Countries Ngulube, Patrick, 2016-09-12 There has been a growth in the use acceptance and popularity of indigenous knowledge High rates of poverty and a widening economic divide is threatening the accessibility to western scientific knowledge in the developing world where many indigenous people live Consequently indigenous knowledge has become a potential source for sustainable development in the developing world The Handbook of Research on Theoretical Perspectives on Indigenous Knowledge Systems in Developing Countries presents interdisciplinary research on knowledge management sharing and transfer among indigenous communities Providing a unique perspective on alternative knowledge systems this publication is a critical resource for sociologists anthropologists researchers and graduate level students in a variety of fields

Phenomenology of Decolonizing the University Zvikomborero Kapuya, 2020-05-05 The epistemic Eurocentric borders expand towards the global south they dehumanise and obliterate existing forms of thinking through colonialism and colonality In doing so the global south has lost the sense of being self Africans have become non thinking objects This has led to a series of ceaseless conflicts poor leadership and developmental crisis and provides fertile ground for Eurocentric superiority This book Phenomenology of Decolonizing the University Essays in the Contemporary Thoughts of Afrikology is a diagnosis of the problems of the mind in the global south and provides solutions in the decolonisation of the mind such as humanising the university the rewriting of African stories and facilitates an epistemic rebellion

Unmarking Whiteness and the New American Racism Michael L. Blakey, 2025-07-18 This book criticizes recent performative solutions to racism diversity programs at universities for example and White people's Fragility or intolerance of mature criticism These ideas are locked in an intellectually gated and defensive conversation that effectively denies the ongoing particular abuses of White supremacy This book instead proposes expensive educational and economic changes including reparations as necessary to achieve real equity Once imputed by the eugenical effects of World War II and the Civil Rights Movement's opposition to White racism the word race was largely stricken from scientific writing But biological determinism remained deeply ensconced in an institution of science that assumed the natural world to be determining making natural science its most authoritative means Authoritative heritability estimates and genetic correlations though spurious continued to imply that obvious racial and class inequalities including their dire health effects were natural and acceptable White people often attempted to unmark their racial identity and assumed that of the uniquely normal people as though an act of anti racism Frankenberg shows On the contrary it served to deny their skin color privileges while enjoying benefits of ongoing structural racism as the only real complete human beings in the room This book uses an ethnology of anthropology to show White people's equivocal views of other's equality in their formal analyses museum collections and exhibitions and treatment of colleagues in recent times They remained deliberately deaf to critical African diasporic scholarship Thus

Unmarking gives an anthropological analysis of the social history of White supremacy and shows what it is like for some to confront it In constructing this historical and sociological counternarrative the author provides a critical new social history that illuminates a tangled and turgid past for contemporary readers students and researchers with vital insights for anthropology sociology history cultural studies philosophy and American studies **Great Zimbabwe** Shadreck

Chirikure,2020-11-29 Conditioned by local ways of knowing and doing Great Zimbabwe develops a new interpretation of the famous World Heritage site of Great Zimbabwe It combines archaeological knowledge including recent material from the author s excavations with native concepts and philosophies Working from a large data set has made it possible for the first time to develop an archaeology of Great Zimbabwe that is informed by finds and observations from the entire site and wider landscape In so doing the book strongly contributes towards decolonising African and world archaeology Written in an accessible manner the book is aimed at undergraduate students graduate students and practicing archaeologists both in Africa and across the globe The book will also make contributions to the broader field such as African Studies African History and World Archaeology through its emphasis on developing synergies between local ways of knowing and the archaeology

Managing Archaeological Resources Francis P McManamon,Andrew Stout,Jodi A Barnes,2016-06-03 Original research articles show the range of activities issues and solutions undertaken by contemporary managers of heritage sites around the world Racial Segregation and Eugenical Science Between the Wars Michael L. Blakey,2025-07-18 This volume examines the rise and decline of racial science and its relationship to the political and social imposition of Jim Crow in the American South a racialized code of laws grounded upon an inherently racist and prejudicial pseudoscience The author argues here that the study of human beings within the emerging 18th and 19th century institutions of Western science was corrupted by the limited social intuitions of its enslaving colonizing and elitist members Western science and White societies plowed forward in continued ideological adherence to a biodeterministic imagination to justify slavery then Jim Crow racial segregation immigration restriction and other deadly and exploitative eugenical solutions of Social Darwinist thought The story is further complexified by the countervailing theories and voices of Black and Jewish intellectuals in the social and biocultural sciences in the 19th and 20th centuries such as Frederick Douglass W E B Du Bois and Montague Cobb These had profound consequences not only for the social sciences but also for the cultural life of Black Americans in the aftermath and afterlife of slavery At the same time even here the author discloses that the racialized dimensions of social science could not be fully exorcised as social science continued to construct soft line racism in that it selectively primitivized darker people and omitted White racism and colonialism from their human story African American social scientists and historians brought White racism and Black modernity to the fore Eugenics had begun to paint marginal White people Jewish and Italian immigrants to the United States as natural inferiors to Nordics or Aryans with devastating consequences in World War II Europe As the War ended the world community began its turn against racism in science and society In constructing this historical and
