China's Green Consensus Virginie Arantes, 2022-09-09 Despite contrasting approaches democratic and authoritarian governments all underline the fact that environmental protection is crucial and inevitable and China's enthusiasm in stepping up its efforts to protect the environment has not gone unnoticed This book highlights how the consensual orchestration of sustainability in China's biggest city Shanghai affects non state actors ways of perceiving acting and organizing around environmental issues China's Green Consensus examines grassroots realities as they intersect with events of everyday life offering insights into areas that far transcend debates over coercive forms of environmentalism and exploring the soft and green facets of President Xi Jinping's authoritarian approach to governance The importance of environmental protection in people's lives serves as a lens to analyze and understand authoritarian adaptations to environmental global phenomena Arantes highlights how through mobilization and de politicization a green consensus leads to the displacement of state responsibilities and the cultivation of civil society in its own image In so doing she opens up new ways of thinking about the complexities of environmental governance consensus politics subject making and citizenship in authoritarian contexts This book will be of interest to scholars and students of Chinese society and politics environmental politics political ecology international relations and urbanization in Asia as well as all others interested in the rising appeal of authoritarianism around the globe

Infertile Environments Janelle Lamoreaux, 2022-11-18 In *Infertile Environments* Janelle Lamoreaux investigates how epigenetic research into the effects of toxic exposure conceptualizes and configures environments Drawing on fieldwork in a Nanjing China toxicology lab that studies the influence of pesticides and other pollutants on male reproductive and developmental health Lamoreaux shows how the lab's everyday research practices bring national hormonal dietary maternal and laboratory environments into being She situates the lab's work within broader

Chinese history as well as the contemporary cultural and political moment in which declining fertility rates and reproductive governance and technology are growing concerns She also points to how toxicology in China is a transnational endeavor tied to both local conditions and international research agendas and infrastructures which highlights the myriad scales and scope of epigenetic environments At a moment of growing concerns about toxins endocrine disrupting chemicals and climate change Lamoreaux demonstrates that epigenetic research s proliferation of environments produces new kinds of toxic relations that impact multiple generations of humans *Environmental Pollution in China* Daniel K. Gardner, 2018-06-01

China s economy has grown remarkably quickly in recent decades and is now the second largest in the world but prosperity has come at great environmental cost *Environmental Pollution in China What Everyone Needs to Know* examines the nature of the country s pollution crisis the Chinese people s response to it and the efforts by the state to tackle it *Environmental Justice in the Anthropocene* Stacia Ryder, Kathryn Powlen, Melinda Laituri, Stephanie A. Malin, Joshua Sbicca, Dimitris Stevis, 2021-06-09

Through various international case studies presented by both practitioners and scholars *Environmental Justice in the Anthropocene* explores how an environmental justice approach is necessary for reflections on inequality in the Anthropocene and for forging societal transitions toward a more just and sustainable future Environmental justice is a central component of sustainability politics during the Anthropocene the current geological age in which human activity is the dominant influence on climate and the environment Every aspect of sustainability politics requires a close analysis of equity implications including problematizing the notion that humans as a collective are equally responsible for ushering in this new epoch Environmental justice provides us with the tools to critically investigate the drivers and characteristics of this era and the debates over the inequitable outcomes of the Anthropocene for historically marginalized peoples The contributors to this volume focus on a critical approach to power and issues of environmental injustice across time space and context drawing from twelve national contexts Austria Bangladesh Chile China India Nicaragua Hungary Mexico Brazil Sweden Tanzania and the United States Beyond highlighting injustices the volume highlights forward facing efforts at building just transitions with a goal of identifying practical steps to connect theory and movement and envision an environmentally and ecologically just future This interdisciplinary work will be of great interest to students scholars and practitioners focused on conservation environmental politics and governance environmental and earth sciences environmental sociology environment and planning environmental justice and global sustainability and governance It will also be of interest to social and environmental justice advocates and activists

Politics in China William A. Joseph, 2024 A comprehensive and authoritative introduction to China s political history contemporary political system and key policy areas such as the environment population management and public health *Politics in China* is an authoritative introduction to how the world s second most populous nation and rapidly rising global power is governed today Written by leading China scholars each chapter offers an accessible overview of a key topic in Chinese politics The opening section provides readers with a firm

grounding in China's modern political history covering the decline and fall of the last imperial dynasty and the rise to power of the Chinese Communist Party (CCP) and the radicalism of the era of Mao Zedong (1949-76), the dramatic economic reforms carried out by Deng Xiaoping and his disciples (1978 to 2012), and the era of Xi Jinping (2012 present) who has consolidated more personal power than any CCP leader since Mao. The next section sets the framework of politics in the People's Republic of China (PRC) with chapters on the ideology of the CCP, the structure and dynamics of the political system, the role of law and legal reform, and the policies behind the country's spectacular economic transformation. The book then shifts to a discussion of a series of major political issues in China today: reform and resistance in the countryside, changes and challenges in the cities, the arts and culture, the environment and climate change, public health, population policy, and internet politics. The final chapters of the book cover politics in four important areas located on China's geographic periphery: Tibet, Xinjiang, Hong Kong, and Taiwan. The fourth edition of *Politics in China* has been thoroughly updated and includes a new chapter on the rise and rule of Xi Jinping. It is essential reading not only for students studying the PRC but also for any reader interested in learning how China has evolved in recent times, how its political system works, and about the most important challenges it faces in years ahead.

Greening China's Urban Governance Jørgen Delman, Yuan Ren, Outi Luoma, Mattias Burell, Oscar Almén, 2018-10-24. This volume examines how urban stakeholders in China, particularly city governments and social actors, tackle China's urban environmental crisis. The volume's case studies speak to important interdisciplinary themes such as new tools and instruments of urban green governance, climate change and urban carbon consumption, green justice, digital governance, public participation, social media, social movements, and popular protest. It lays out a unique theoretical framework for examining and discussing urban green governance. The case studies are based on extensive fieldwork that examines governance failures, challenges, and innovations from across China, including the largest cities. They show that numerous policies, experiments, and reforms have been put in place in China, mostly on a pragmatic basis but also as a result of both strategic policy design, civil participation, and protest. The book highlights how China's urban governments bring together diverse programmatic building blocks and instruments from China and elsewhere. Written by experts and researchers from different disciplines at leading universities in China and the Nordic countries in Europe, this volume will be of interest to researchers and students who are interested in Chinese politics, especially urban politics, governance issues, and social movements. Both students and teachers will find the theoretical perspectives and case studies useful in their coursework. The unique green governance perspective makes this a work that is empirically and theoretically interesting for those working with urban political and environmental studies and urbanization worldwide.
