and transportation issues **A Focus on Sustainable Supply Chains and Green Logistics** Emerald Group Publishing Limited,2015-10-30 In a fast moving world the transportation of goods is expected to be more efficient than ever before This compendia features papers that address key themes in green logistics such as benchmarking and energy efficiency and includes highly cited papers from international contributors such as Alan McKinnon and Joseph Sarkis **Green Logistics. Drivers, Paradoxes and Optimization** Julia Maurer,Janina Ernst,Eliane Friedrich,2015-12-10 Seminar paper from the year 2014 in the subject Business economics Supply Production Logistics grade 1 0 University of the Americas Puebla language English abstract This project examines different aspects about Green Logistics First of all the project s topic is defined to receive a first impression what it is about This is followed by the drivers of Green Logistics and its paradoxes Afterwards the environmental issue and the measures of Green Logistics are explained Furthermore the subject of Green IT Solutions is pointed out As last aspect there is an example of the use of Green Logistics of the company DHL To complete the project in the conclusion there are some challenges described that Green Logistics may have to face **Green Logistics. A critical view of the environmentally-friendly measures in the transport and logistics sector** Aryan Tayefeh Noruzi,2016-11-16 Bachelor Thesis from the year 2016 in the subject Business economics Supply Production Logistics grade 1 3 Cologne University of Applied Sciences Schmalenbach language English abstract What is the main motivation for the implementation of environmentally friendly concepts by logistics companies Are there really noble goals behind this movement or is it more based on the improvement of their public image The goal of this Bachelor thesis is to identify clearly if the measures of the logistics and transport sectors are just to improve their image or if they want to make a significant and real contribution to environmental protection Furthermore it will analyse if the implementation of these ecological strategies comes along with economic advantages To be able to answer these questions different exemplary Green Logistics concepts will be considered critically with a focus on the implementation of alleged environmentally friendly measures in the transport and logistics sector In recent years climate change and global warming were again and again big topics in politics the economy and society International debate about greenhouse gases as well as noise and fine dust pollution attracted considerable attention from the public According to the report of the Intergovernmental Panel on Climate Change IPCC it is becoming obvious that the causes of climate change are the greenhouse gases This has led to an increased awareness for environmental protection by the general public in relation to the importance for the current and the next generations Due to various actions and events for instance the nuclear accident in Fukushima and flood disasters in central Europe the topic of environmental protection has developed as an important element of human action The essential reason for global warming is the way in which humans live their lives In particular in the western countries the way of life has changed drastically with the introduction of industrialization Therefore large quantities of coal oil and gas are burned resulting in a large amount of carbon dioxide CO₂ That is why the industrialised countries have to carry such a big responsibility when it comes to protecting the environment

Green Logistics. Strategies, measures and the emerging benefits for companies in the context of green logistics Tabea Massak, 2022-01-26 Bachelor Thesis from the year 2014 in the subject Business economics Supply Production Logistics grade 1.0 Fachhochschule Salzburg language English abstract With the help of this bachelor thesis the development from logistics to green logistics is presented Furthermore the differences in the objectives are shown Based on the work it is illustrated whether the entrepreneurs are aware of the current environmental situation Furthermore measures are addressed that can be implemented in the companies These measures are intended to increase transport efficiency in the long term and provide guidance on how to make logistics more environmentally friendly Globalization and the increasing number of transports have a negative impact on the environment The environmental impact results primarily from the CO2 emissions caused in the process However the results also show that companies are willing to make their supply chain greener and take action accordingly In the literature some reasons are given why the implementation of green logistics is inevitable As a conclusion it can be seen that green logistics will play an important role in the future as companies themselves want to act more sustainably
